NOTICE OF REGULAR MEETING

**ROGERS COUNTY BOARD OF COUNTY COMMISSIONERS
ROGERS COUNTY, OKLAHOMA**

PLACE: Rogers County Courthouse, 1st Floor - Commissioners Meeting Room
200 S. Lynn Riggs Blvd., Claremore, Oklahoma

DATE & TIME: Monday, January 26, 2026 at 9:00 am

AGENDA

**CONSIDERATION, DISCUSSION AND POSSIBLE ACTION TO BE TAKEN ON THE
FOLLOWING LISTED ITEMS ON THE AGENDA:**

CALL TO ORDER

ROLL CALL TO ESTABLISH QUORUM

PLEDGE OF ALLEGIANCE

INVOCATION: Julie Dermody

APPROVE/DISAPPROVE MINUTES: January 20, 2026 Regular Meeting

ANNOUNCEMENTS:

**Pending inclement weather and the risk of closure on Monday, January 26, 2026 a special
meeting has been scheduled for Tuesday, January 27, 2026 @ 1:15 pm**

NEW BUSINESS:

UTILITY PERMITS:

1. District 2
Lightsource Communications - To Parallel County Highway or Local Road Old Hwy 20
approximately 0.04 miles E of SH-20 and further described as: 825 feet E of the NW Corner of
Section 14, Township 21N, Range 15E, Rogers County. U26-4
2. District 2
ONG - To Cross County Highway or Local Road at 20784 Valley West Dr., Claremore,
approximately 2.58 miles W & 1.98 miles N of Junction SH20 and SH66 and further described as:
1,214 feet N of the SW Corner of Section 11, Township 21N, Range 15E, Rogers County. U26-8
3. District 1
Cox Communications - To Cross County Highway or Local Road E. 445 Rd. approximately 0.14
miles NE of Old Hwy 88 and further described as: 2,584 feet N of the SE Corner of Section 24,
Township 22N, Range 15E, Rogers County. U26-9
4. District 1
Cox Communications - To Cross County Highway or Local Road S. 4130 Rd. approximately 0.48
miles NE of Old Hwy 88 and further described as: 656 feet S of the NW Corner of Section 19,
Township 22N, Range 16E, Rogers County. U26-10
5. District 2
ONG - To Cross County Highway or Local Road at 13664 N. 155th E. Ave., Collinsville,
approximately 1.11-mile E & 2.09 miles N of Junction US 169 & SH 20 and further described as:
1,966 feet W of the SE Corner of Section 27- TS 22N- Range 14E. Rogers County. U26-12
6. District 3
ONG - To Cross County Highway or Local Road 8802 E. Hwy 20 approximately 2.2 miles SW of
Intersection of Hwy 20 & Hwy 88 and further described as: 1,169 feet W of the NE Corner of
Section 14- TS 21N- Range 15E. Rogers County. U26-13

BIDS:

REVIEW/LET

1. 2026-34 Request for Proposals for Third-Party Industrial Inspection Services

OPEN/AWARD

1. 2026-32 Graphics for Emergency Management Vehicles

TRANSFER OF FUNDS:

1. From General Fund Insurance Benefits Health Insurance (0001-1-2300-1222) into General Fund Longevity (0001-1-2300-1235) in the amount of \$171.52 for longevity payout for employees leaving the employment of Rogers County
2. From Visual Inspections Salaries (0001-1-1700-1110) into Visual Inspections Rentals & Leases (0001-1-1700-2040) in the amount of \$1,980.00 for inspection by JD Oasis LLC to visually inspect 66 commercial parcels located outside the 2026 visual inspection area

CLAIMS:

1. **Salaries:** January Payroll

BLANKET PURCHASE ORDERS:

1. Materials, Supplies, Parts, Groceries & Prescriptions

AGENDA ITEMS:

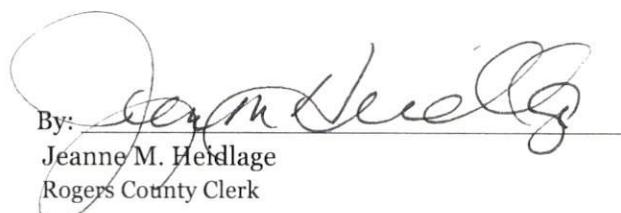

1. Discussion/possible action regarding the appointment of two directors as representatives to the Grand Gateway Board of Directors (DeLozier)
2. Discussion/possible action regarding amendment/clarification on the contract with JD Oasis for Visual Inspections (ADA Wagner)
3. Discussion/possible action regarding Cooperative Agreement with Ed Sanders to enter private property to remove brush and shape ditches for water drainage pursuant to OKLA. STAT. tit.69 § 643.1 (DeLozier)
4. Discussion/possible action regarding Cooperative Agreement with Myrtle Prather to enter private property to remove brush and shape ditches for water drainage pursuant to OKLA. STAT. tit.69 § 643.1 (DeLozier)
5. Discussion/possible action to approve Resolution No. 2026-129 regarding vacating the 10' drainage easements which abut each other on Lots 26 and 27 of Block 1 in The Bluffs at Stone Canyon. (Hendrix)
6. Acknowledge letter of retirement from Scott Marsh, Assessor (Clerk)
7. Discussion/possible action regarding service agreement with Emergency Power Systems, Inc for Rogers County Detention Center for both the IGSA (new) unit and the Magnum towable generators (Burrows)
8. Discussion/ possible action regarding approval of Interlocal Agreement between Rogers County and Town of Verdigris for a road rehabilitation project on S. 4120 Rd (Burrows)

PAYMENT OF PURCHASE ORDERS FROM ALL DEPARTMENTS: Resolution 2026-130

RECESS OR ADJOURNMENT:

BOARD OF COUNTY COMMISSIONERS
ROGERS COUNTY, OKLAHOMA

By: 
Jeanne M. Heidlage
Rogers County Clerk

*Notice of said meeting was filed in the Office of the County Clerk on **Thursday, January 22, 2026 @ 4:00 pm** and posted in the display case near the front entrance to the courthouse and on the county website*

ROGERS COUNTY BOARD OF COUNTY COMMISSIONERS

Monday, January 20, 2026 Regular Meeting

MINUTES

Chairman Burrows called the meeting to order; Roll call – DeLozier-present, Hendrix-present, Burrows-present – quorum established and noted that the agenda was properly posted on Thursday, January 15, 2026 at 4:00 pm

Steve Hendrix led the flag salute and Coy Jenkins offered a prayer

APPROVE/DISAPPROVE MINUTES: January 12, 2026 and January 14, 2026 Regular Meetings
DeLozier motioned to approve, second Hendrix; Roll call – DeLozier-aye, Hendrix-aye, Burrows-aye – Motion carried

ANNOUNCEMENTS: Jeanne Heidlage announced that Fair Board filing runs January 21 -30, 2026.
Applications are available in the County Clerk's office

NEW BUSINESS: None

UTILITY PERMITS:

1. District 1

RWD #3 Rogers County - To Cross County Highway or Local Road S. 4240 Rd. approximately 0.45 miles N of E. 410 Rd. and further described as: 2,900 feet South of the NW corner of Section 36, Township 23N, Range 17 E., Rogers County. U26-3

DeLozier motioned to approve, second Hendrix; Roll call – DeLozier-aye, Hendrix-aye, Burrows-aye – Motion carried

2. District 3

ONG - To Cross County Highway or Local Road S. Beechwood Ln. approximately 0.86 miles W and 0.23 miles N of Junction of US 412 & SH 88 and further described as: 1,790 feet S & 1,824 feet W of the NE Corner of Section 31, Township 20N, Range 17E, Rogers County. U26-5

Burrows motioned to approve, second DeLozier; Roll call – DeLozier-aye, Hendrix-aye, Burrows-aye – Motion carried

3. District 3

ONG - To Cross County Highway or Local Road at 30453 S. 4180 Rd. approximately 2.5 miles W and 0.31 miles N of Junction of US 412 and SH 88 and further described as: 1,352 feet S of the NE Corner of Section 35- TS 20N- Range 16E. Rogers County. U26-6

Burrows motioned to approve, second DeLozier; Roll call – DeLozier-aye, Hendrix-aye, Burrows-aye – Motion carried

4. District 2

ONG - To Cross County Highway or Local Road N. 154th E. Ave. and Parallel E. 79th Pl. N. approximately 2.72 miles E & 3.36 miles N of Junction US 169 & SH 266 and further described as: 290 feet E of the NW Corner of Section 27, Township 21N, Range 14E, Rogers County. U26-7

Hendrix motioned to approve, second DeLozier; Roll call – DeLozier-aye, Hendrix-aye, Burrows-aye – Motion carried

TRANSFER OF FUNDS:

1. From General Fund Health Benefits (0001-1-2300-1222) into General Fund Health Savings (0001-1-2300-1252) in the amount of \$1,060.00 for additional HSA participation

DeLozier motioned to approve, second Hendrix; Roll call – DeLozier-aye, Hendrix-aye, Burrows-aye – Motion carried

2. From Hwy Sales Tax Maintenance and Operations (1313-6-8041-2005) into Hwy Sales Tax Capital Outlay (1313-6-8041-4110) for purchase of equipment

DeLozier motioned to approve transfer in the amount of \$80,000, second Hendrix; Roll call – DeLozier-aye, Hendrix-aye, Burrows-aye – Motion carried

BLANKET PURCHASE ORDERS:

1. Materials, Supplies, Parts, Groceries & Prescriptions
- DeLozier motioned to approve 32 Blanket Purchase Orders totaling \$36,000, second Hendrix; Roll call – DeLozier-aye, Hendrix-aye, Burrows-aye – Motion carried

AGENDA ITEMS:

1. Monthly Report of Officers – Sheriff
- DeLozier motioned to approve, second Hendrix; Roll call – DeLozier-aye, Hendrix-aye, Burrows-aye – Motion carried
2. 4th Quarter Fixed Asset Inventory 2025
- All offices reporting. DeLozier motioned to approve, second Hendrix; Roll call – DeLozier-aye, Hendrix-aye, Burrows-aye – Motion carried
3. Annual Commissary Report – Sheriff
- DeLozier motioned to approve, second Hendrix; Roll call – DeLozier-aye, Hendrix-aye, Burrows-aye – Motion carried
4. Discussion/possible action regarding Change Order agreements 1 & 2 between Rogers County and Cunningham Construction for the Emergency Management building project (Hendrix)
- Hendrix motioned to approve, second DeLozier; Roll call – DeLozier-aye, Hendrix-aye, Burrows-aye – Motion carried
5. Discussion/possible action regarding new mileage reimbursement rate beginning January 1, 2026 (Burrows)
- DeLozier motioned to approve new mileage rate of \$.725 effective January 1, 2026, second Hendrix; Roll call – DeLozier-aye, Hendrix-aye, Burrows-aye – Motion carried
6. Discussion/possible action to review, revise, and/or approve Sales Tax Increment Agreement between the Town of Inola and the Board of County Commissioners of Rogers County (Burrows)
- Burrows motioned to approve, second DeLozier; Roll call – DeLozier-aye, Hendrix-aye, Burrows-aye – Motion carried
7. Discussion/possible action regarding the denial of FEMA-4791-DR-OK, Project Nos.: 765252 and 765277 and requesting arbitration in lieu of second appeal and authorizing Carl Statton to prepare all documents necessary for arbitration (DeLozier)
- DeLozier motioned to approve, second Hendrix; Roll call – DeLozier-aye, Hendrix-aye, Burrows-aye – Motion carried
8. Discussion/possible action to enter executive session pursuant to Okla. Stat. tit. 25, § 307(C)(11) for the purpose of conferring on matters pertaining to economic development, including the transfer of property, financing, or creation of a proposal to entice a business to remain or locate within Rogers County, where the public disclosure of the matter discussed would interfere with the development of products or services and/or public disclosure would violate the confidentiality of the business: to wit conferring with Meggie Froman-Knight, Claremore Economic Development Authority, regarding matters pertaining to economic development within Rogers County (ADA Wagner)
- DeLozier motioned to approve, second Hendrix; Roll call – DeLozier-aye, Hendrix-aye, Burrows-aye – Motion carried to enter Executive Session at 9:15 am
9. Discussion/possible action to enter executive session pursuant to Okla. Stat. tit. 25, § 307(C)(11) for the purpose of conferring on matters pertaining to economic development, including the transfer of property, financing, or creation of a proposal to entice a business to remain or locate within Rogers County, where the public disclosure of the matter discussed would interfere with the development of products or services and/or public disclosure would violate the confidentiality of the business: to wit conferring with Meggie Froman-Knight, Claremore Economic Development Authority, regarding matters pertaining to economic development within Rogers County
- Duplicate item; no action
10. Discussion/possible action on matters discussed in executive session relating to economic development within Rogers County, including the transfer of property, financing, or creation of a proposal to entice a business to remain or locate within Rogers County
- Hendrix motioned to end Executive Session, second DeLozier; Roll call – DeLozier-aye, Hendrix-aye, Burrows-aye – Motion carried to end Executive Session at 11:04 am. There will be no action on matters discussed in Executive Session

PAYMENT OF PURCHASE ORDERS FROM ALL DEPARTMENTS: Resolution 2026-128
DeLozier motioned to approve, second Hendrix; Roll call – DeLozier-aye, Hendrix-aye, Burrows-aye – Motion carried

RECESS OR ADJOURNMENT:

DeLozier motioned to adjourn, second Hendrix; Roll call – DeLozier-aye, Hendrix-aye, Burrows-aye – Motion carried to adjourn at 11:05 am

Approved by the ROGERS COUNTY BOARD OF COUNTY COMMISSIONERS at the _____
REGULAR MEETING

Utility / Pipeline Permit

Permit Number: **U26-000004**

Issued On:

Permit Type: **Parallel**

Commissioners District: District 2 (Old Hwy 20)

In pursuance of the filing of the required application and plans and specifications by:

Applicant: Lightsource Communications

PERMISSION IS HERBY GRANTED TO:

Location:

The installation will be made in the following manner:

Parallel

Size of the line:

Size of Casing

Wall Thickness:

Alloy/Material:

Contents:

Mfg. Test Pressure:

Working Pressure:

Max. Operating Pressure:

To Parallel County Highway or Local Road Old Hwy 20 approximately 0.04 miles E of SH-20 and further described as: 825 feet E of the NW Corner of Section 14, Township 21N, Range 15E, Rogers County.

Applicant is required to contact the Planning Commission office to schedule an inspection prior to installation of the utility to insure that the utility is being placed in the correct location. Applicant is required to schedule an inspection for all boring/trenching inspections to insure the correct depth is in place. Applicant is required to schedule a final inspection once work is complete to release all bonds. Applicant shall insure that all streets, driveways and or property entrances shall be restored to a useable condition by the end of the work day, every day prior to the completion of said work. One copy of the approved permit must be kept at the work site for inspection by the Planning Commission Director or his representatives. Applicant is to have an inspector or engineer present at all times during construction to insure that installation is made in accordance with plans and specifications approved by the County. No deviation from the approved plans and specifications will be made without the approval of the Planning Commission Director. Clearance above the traffic lanes at County highway or local roads at all pole line crossings should comply with applicable safety codes, and will not be less than 20 feet. Any deviation must be approved by the Planning Commission Director. The top of the conduit should be a minimum of 48 inches below sub-grade, but not less than 30 inches below the bottom of the ditches. The utility owner will be responsible for any damage resulting from deviation of the assigned corridor. All buried facilities should be placed at a minimum depth 30 inches, except for power, which should be placed at a minimum of 48 inches below the surface. Observation of all additional requirements indicated in the Utility / Pipeline Permit Application is required.

ROGERS COUNTY
OKLAHOMA

District #2

County Staff to Complete this Section

Permit Number: U2Co-4

Issued Date: _____

Fee Collected: 2762.50

UTILITY / PIPELINE PERMIT APPLICATION

The Board of County Commissioners has deemed it necessary and in the public interest to establish policies, requirements, and fees for obtaining permits for the construction of utility lines pertaining to all utility companies, both public and private; oil companies; gas companies; pipe line companies; telephone companies; contractors; developers; engineers or any person, firm or corporation not specifically excluded by law, desiring to construct, install or locate a pipeline, utility line, cable or other facility within the boundaries of a public roadway/street or easement. Prior to constructing any pipeline, utility line, cable line, etc., a permit shall be secured from the Rogers County Office of the Planning Commission.

The following items are required:

- An appropriate scale drawing showing the location of proposed utility installations.
- "As-built" drawings with top of pipe or cable elevations or ground to line clearances shown every one hundred feet (100')
- An erosion control plan
- Applicable fees (Not applicable to political subdivisions and agencies of the State, public trusts, municipal owned utilities, or rural water districts)
 - Administration Fee: \$100.00 (required for all applications)
 - Road Crossing: \$150.00 Each (underground bore or overhead installation)
 - Parallel Installation: \$0.30 per foot of occupied right-of-way
- Cash Bond in the Form of Cashier's Check (Not applicable to political subdivisions and agencies of the State, public trusts, municipal owned utilities, or rural water districts)
 - \$500.00 for Crossing Gravel Rd
 - \$1000.00 for Crossing Hard Surface Rd
 - \$500.00 for Parallel Install One Mile or Less
 - \$500.00 for Additional Parallel Install per Mile

Installation without first securing a permit, shall incur a fee of Two Thousand Five Hundred Dollars (\$2,500.00) and no future permit shall be issued until all costs, damages and other requirements of these rules and regulations have been met to the satisfaction of the Rogers County Board of County Commissioners.

ROGERS COUNTY
UTILITY PERMIT

PERMIT No. _____

This authority executed in the original and three copies this _____ day of _____, _____ by the Rogers County Planning Commission, acting for and on behalf of Rogers County, Hereinafter called the County, Witnessed:

That the County does by these presents, grant to:

Applicant: Lightsource Communications, LLC _____ Attention: Dan Enright _____

Mailing Address: 16737 Anderson Dr. _____

MI _____ Zip Code: 48195 _____ City: Southgate _____ State: _____

Telephone: 284-761-4235 _____ E-mail: denright@lightsourcecom.net _____

A permit to erect, construct and maintain a Fiber Optic cable _____ along, upon or across the hereinafter said for the purpose of transporting, selling, and using Communications _____

and shown on the attached and further described as follows:

LOCATION:

To Parallel _____ County Highway or Local Road Old Hwy 20 _____ Approximately .04 _____ miles
 E _____ Cross or Parallel _____ of SH-20 _____
 (N.E.S.W.) _____ (Nearest County Highway or Local Road Junction)

and further described as: 825 _____ feet East _____ of the NW _____
 (N.E.S.W.) _____

Corner of Section 14 _____ Township 21N _____ Range 15E _____
 (NE, NW, SE, SW)

County Rogers _____ Size of line .75" _____ Size of casing 2" _____

The installation will be made in the following manner:

Directional Bore**(Boring, pushing, overhead crossing, and other description)**

All information requested on the form must be supplied. Drawings clearly illustrating work to be performed within the County maintained roadway right-of-way and all other utility facilities in the area of this permit should be provided with the permit application. A plan view will be sufficient, except where a crossing of this County maintained roadway is involved. Each roadway crossing must be represented by an actual profile and cross-section view, regardless of the type of facility being installed. The owner must self-certify that the facility is located in the corridor approved by the Planning Commission Director.

1. Work to be performed on County right-of-way must have the prior approval of the Planning Commission Director & Board of County Commissioners. The start date and completion date must be provided. Final inspection by the Rogers County Planning Commission will take place at the completion of the project to determine compliance with the approved permit. Under no circumstances will any work be done on County right-of-way until approval has been obtained. No work will be done on County right-of-way on Saturdays, Sundays, Holidays or after dark unless approved by the Planning Commission Director. The Planning Commission Director may require a pre-construction conference.
2. Public utilities or cable television systems shall completely repair or replace any damage, injury or other change to public roads or highways or rights-of-way of this state or any county or municipality which would inconvenience or endanger the public which are caused by the erection, placement, adjustment, construction or maintenance of any public utility or cable television system poles, wires, posts, conduits or other equipment. Okla. Stat. Ann. tit. 69, § 1401 (West).
3. One copy of the approved permit must be kept at the work site for inspection by the Planning Commission Director or his representatives. Applicant is to have an inspector or engineer present at all times during construction to insure that installation is made in accordance with plans and specifications approved by the County. No deviation from the approved plans and specifications will be made without the approval of the Planning Commission Director.

4. The applicant must agree to hold the County harmless for any damage or injury to persons or property caused by or resulting from the construction, maintenance, operation, or repair of his facilities on, under, or over the County right-of-way, and must further agree to reimburse the County for repair of any damage to County facilities caused by the construction, maintenance and/or operation of the facility.
5. No driveways, local roads, County roads, ditch liners, structures or surfaced areas will be cut unless approved by the Planning Commission Director and/or Board of County Commissioners.
6. All work on the County right-of-way is to be done in accordance with current ODOT "Standard Specification for Highway Construction". At the conclusion of such work, the right-of-way must be cleaned up and left in a presentable condition. Cleanup will include replacing any protective grass cover destroyed by trenching or the operation of any equipment, and correcting any other damage that may have been caused, as directed by the Planning Commission Director.
7. The applicant must furnish all flagmen, lights, barricades, and warning signs during the construction, maintenance, or repair of his facilities on the County's right-of-way, as required by County standards and "The Manual on Uniform Traffic Control Devices".
8. In some cases, the applicant must post a performance bond in an amount determined by the Planning Commission Director. Necessity for such bond will be determined by the Planning Commission Director and the bond will be held in his/her office until the right-of-way is in a presentable condition.
9. When notified to do so by the County, the applicant agrees to make all changes in the facilities on County right-of-way within the County's established time period at the applicant's own expense, unless otherwise provided by law or order of the County.
10. **Clearance above the traffic lanes at County highway or local roads at all pole line crossings should comply with applicable safety codes, and will not be less than 20 feet.** All poles, posts, stubs, fixtures, down guys, wires, and other appurtenances must be kept in good repair at all times. Facilities located on the highway right-of-way outside the control of access limits must be kept free of weeds and brush within five feet of the installation. Parallel overhead lines on all highway right-of-way should be limited to single pole construction. All crossing should be as nearly perpendicular as possible. Any deviation must be approved by the Planning Commission Director.
11. All encased crossings should have casing from right-of-way line to right-of-way line and be sealed at both ends with an approved conduit seal (standard neoprene, rubber and comparable seals will be approved) and vented outside the right-of-way lines, unless otherwise approved by the Planning Commission Director. **The top of the conduit should be a minimum of 48 inches below sub-grade, but not less than 30 inches below the bottom of the ditches.** The casing must be designed to sustain roadway loadings, contain and divert from the roadway the contents of the carrier pipe, and have a life expectancy equal to or greater than the carrier pipe. The vents should be sized to allow proper release of carrier pipe contents in case of failure. The minimum pipe size for vents is 2 inch nominal, and the vent must extend a minimum of 36 inches above natural ground level. The owner must install identification markers at each right-of-way line directly above the facility. The markers may be attached to vents or to a right-of-way fence, and should be placed over parallel underground facilities at each change in direction and not more than 1000 foot intervals. The markers may be in the owner's standard design, but must identify the owner stating address and telephone number, size of facility, and must be at least 130 sq. inches in area. They must also be erected at a location plainly visible from within the County right-of-way.

All underground electric cable crossings must be placed in a conduit and be a minimum of 48 inches below the ditch flow lines. Conduit placed beneath a roadway may be steel, HDPE, Heavy Duty PVC or fiberglass if it is designed to withstand highway loading and is properly protected. Encasement for underground power lines, or similar facilities, should comply with the above, except for the installation of vents, and seals, and the ability to contain and divert. Methods for boring the roadway shall be the same as for any other bored crossing. Encasement for underground telephone lines is not required.

Steel pipelines crossing the right-of-way may be installed without encasement if the installation is in accordance with ODOT's "Special Provisions for the Installation of Underground Pipelines...." This Special Provision stipulates in part that carrier pipe material within the right-of-way must be superior to the carrier pipe material outside the right-of-way by being of steel at least one grade better and of the same wall thickness, or a minimum of one wall thickness greater and of the same alloy. Pipe must be 48 inches below the flow line of drainage ditches and all other highway drainage facilities, and must be properly protected from corrosion.

Facilities such as water and sanitary sewer lines, crossing the highway right-of-way may be approved without encasement, if cast or ductile iron, HDPE or material of equal design is used, with the understanding that maintenance in the event of failure will be performed in accordance with the AASHTO publication, "A Policy on the Accommodation of Utilities on Freeway Rights-of-Way" and, more specifically, service will not be rendered from through traffic lanes or ramps. If a replacement facility becomes necessary, replacement will be made by boring or punching under the roadway or by inserting replacement pipe through the existing pipe, or any other approved method that will prevent disturbance of the highway. AC, PVC, or equivalent material lines will not be permitted without the use of a steel or equivalent material, conduit. In any case, all conduit shall be sufficient to withstand roadway loadings.

All underground crossings must be installed by boring or punching or other approved methods. The method and equipment for the installation must be approved by the Planning Commission Director. When boring beneath a roadway, water may be used provided the elevation is a minimum of 5 feet below the sub-grade. Sufficient water for lubricating the bit is acceptable; however, jetting or pressure flushing of the bore will not be permitted. The alignment of the bore is to be established by drilling a pilot hole before beginning the full size bore. When water is used, the annular space outside the conduit or carrier pipe is to have grout placed at a minimum of 10 PSI pressure, to insure against cavities beneath the roadbed. No digging or equipment will be permitted in center medians without special permission from the Planning Commission Director.

When pipe/conduit is placed, construction should be done by either jacking, dry boring, or tunneling. When boring in cohesion less materials, jacking, dry boring, or tunneling shall be done in conjunction with the advancement of a conduit/pipe. When boring in Bentonite Clay or equivalent material, drilling mud shall be required at the ends of the bore for a minimum distance of 1-foot. A natural clay or concrete plug will be acceptable for other bores.

Time to complete a bore shall be kept within the limits of open boring or advancing a conduit that can be properly reamed and cleaned out within one working day. Under no circumstance shall muck or water be left standing inside the bore at the end of a working day, or due to a break-down of equipment of more than eight hours.

If considered necessary, pressure grouting of the voids will be required when the diameter of any bore exceeds the outside diameter of the pipe by 2 inches or more. No trenching will be allowed inside the control of access limits unless approved by the County. In the interest of safety, no trenching shall be performed or equipment parked within 30 feet of the edge of the traffic lanes. In unusual cases where trenching is necessary, a special plan with specifications will be developed by the owner with assistance from the Planning Commission Director, setting out the method for controlling the traffic, placement of the facility and proper restoration of the roadway. These specifications must be approved by the Planning Commission Director.

11. Parallel facilities outside the control of access, but inside the right-of-way, must be installed in the assigned corridor, as approved by the Planning Commission Director. **The utility owner will be responsible for any damage resulting from deviation of the assigned corridor. All buried facilities should be placed at a minimum depth 30 inches, except for power, which should be placed at a minimum of 48 inches below the surface.** All nonferrous lines must have an electrically conductive wire, with test points, or other means of locating the pipe while it is underground. The

ditch must be backfilled to a density equal to the adjacent soil, and a proper vegetative cover established on the area disturbed. **All parallel underground electric cables must be placed a minimum of 48 inches below the surface and marked at each point of change in direction.**

12. The applicant must agree to refrain from disturbing trees, shrubbery, or any part of the landscape without approval of the Planning Commission Director. If it becomes necessary to disturb trees or shrubbery, the applicant's intentions must be plainly stated in the application that will include size and kind of trees and shrubs, and disposition during installation.
13. The Utility agrees to comply with all applicable laws and regulations necessary to meet the Oklahoma Department of Environmental Quality (ODE) requirements for pollution prevention including discharges from storm water runoff on this project. Further, the Applicant agrees as stipulated in the Ode's *General Permit* to secure a storm water permit with the ODE, when required. It is agreed that the project plans and specifications, required schedules for accomplishing the temporary and permanent erosion control work, the storm water pollution prevention plan and the appropriate location map contained in the plans constitute the storm water management plan for the project previously described in the document. The Applicant agrees to have daily operational control of those activities at the site necessary to ensure compliance with plan requirements and permit conditions. The Applicant agrees to file jointly the Notice of Intent (NOI), when required, for a general construction Oklahoma Pollutant Discharge Elimination System (OPDES) permit with ODEQ that authorizes discharges of storm water associated with construction activity from the project site identified in this document.
14. The applicant must be familiar with the AASHTO Policy referred to above, particularly that portion which prohibits the installation or future maintenance of a utility facility from through traffic lanes or ramps.
15. **The applicant must agree to hold the County harmless for any and all damage that the utility facilities might sustain while occupying County right-of-way.**
16. Blasting will not be permitted within the County right-of-way except in unusual cases and only with special approval from the Planning Commission Director.
17. The applicant agrees to notify all owners who have facilities in the area encompassed by this permit. OKIE ONECALL [(800) 522-6543] and the Commissioner for the District will be notified 5 working days prior to the beginning of any work.

This permit may be revoked for noncompliance or failure to begin work within a one-year period of date of approval.

Utility / Pipeline Permit

Permit Number: **U26-000008**

Issued On:

Permit Type: **Boring**

Commissioners District: 2

In pursuance of the filing of the required application and plans and specifications by:

Applicant: Oklahoma Natural Gas Company

PERMISSION IS HERBY GRANTED TO:

The installation will be made in the following manner:

Boring

Size of the line: 3/4

Size of Casing NA

Wall Thickness: .095

Alloy/Material: D2513, PE3408

Contents: NG

Mfg. Test Pressure: 1600#

Working Pressure: 30#

Max. Operating Pressure: 60#

Location:

To Cross County Highway or Local Road at 20784 Valley West Dr., Claremore, approximately 2.58 miles W & 1.98 miles N of Junction SH20 and SH66 and further described as: 1,214 feet N of the SW Corner of Section 11, Township 21N, Range 15E, Rogers County.

Applicant is required to contact the Planning Commission office to schedule an inspection prior to installation of the utility to insure that the utility is being placed in the correct location. Applicant is required to schedule an inspection for all boring/trenching inspections to insure the correct depth is in place. Applicant is required to schedule a final inspection once work is complete to release all bonds. Applicant shall insure that all streets, driveways and or property entrances shall be restored to a useable condition by the end of the work day, every day prior to the completion of said work. One copy of the approved permit must be kept at the work site for inspection by the Planning Commission Director or his representatives. Applicant is to have an inspector or engineer present at all times during construction to insure that installation is made in accordance with plans and specifications approved by the County. No deviation from the approved plans and specifications will be made without the approval of the Planning Commission Director. Clearance above the traffic lanes at County highway or local roads at all pole line crossings should comply with applicable safety codes, and will not be less than 20 feet. Any deviation must be approved by the Planning Commission Director. The top of the conduit should be a minimum of 48 inches below sub-grade, but not less than 30 inches below the bottom of the ditches. The utility owner will be responsible for any damage resulting from deviation of the assigned corridor. All buried facilities should be placed at a minimum depth 30 inches, except for power, which should be placed at a minimum of 48 inches below the surface. Observation of all additional requirements indicated in the Utility / Pipeline Permit Application is required.

ROGERS COUNTY

District 2

County Staff to Complete this Section

Permit Number: U210-8

Issued Date: _____

Fee Collected: 250.00
U21-08333

UTILITY / PIPELINE PERMIT APPLICATION

The Board of County Commissioners has deemed it necessary and in the public interest to establish policies, requirements, and fees for obtaining permits for the construction of utility lines pertaining to all utility companies, both public and private; oil companies; gas companies; pipe line companies; telephone companies; contractors; developers; engineers or any person, firm or corporation not specifically excluded by law, desiring to construct, install or locate a pipeline, utility line, cable or other facility within the boundaries of a public roadway/street or easement. Prior to constructing any pipeline, utility line, cable line, etc., a permit shall be secured from the Rogers County Office of the Planning Commission.

The following items are required:

- An appropriate scale drawing showing the location of proposed utility installations.
- A Certificate of Liability Insurance for the Contractor
- "As-built" drawings with top of pipe or cable elevations or ground to line clearances shown every one hundred feet (100')
- An erosion control plan
- Applicable fees (Not applicable to political subdivisions and agencies of the State, public trusts, municipal owned utilities, or rural water districts)
 - Administration Fee: \$100.00 (required for all applications)
 - Road Crossing: \$150.00 Each (underground bore or overhead installation)
 - Parallel Installation: \$0.30 per foot of occupied right-of-way
- Cash Bond in the Form of Cashier's Check (Not applicable to political subdivisions and agencies of the State, public trusts, municipal owned utilities, or rural water districts)

\$500.00 for Crossing Gravel Rd

- \$1000.00 for Crossing Hard Surface Rd
- \$500.00 for Parallel Install One Mile or Less
- \$500.00 for Additional Parallel Install per Mile

Installation without first securing a permit, shall incur a fee of Two Thousand Five Hundred Dollars (\$2,500.00) and no future permit shall be issued until all costs, damages and other requirements of these rules and regulations have been met to the satisfaction of the Rogers County Board of County Commissioners.

ROGERS COUNTY
UTILITY PERMIT

PERMIT No. _____

This authority executed in the original and three copies this _____ day of _____, _____ by the Rogers County Planning Commission, acting for and on behalf of Rogers County, Hereinafter called the County, Witnessed:

That the County does by these presents, grant to:

Telephone: (405) 812-8436 _____ E-mail: robin.wall@onegas.com _____

A permit to erect, construct and maintain a natural gas pipeline _____ along, upon or across the hereinafter said for the purpose of transporting, selling, and using natural gas _____

and shown on the attached and further described as follows:

LOCATION:

To Cross _____ County Highway or Local Road 20784 Valley West Dr., Claremore _____ Approximately 2.58 mi W & 1.98 miles
Cross or Parallel
N _____ of Junction SH 20 and SH 66 _____
(N.E.S.W.) (Nearest County Highway or Local Road Junction)

and further described as: 1214 _____ feet N _____ of the SW _____
(N.E.S.W.) (NE, NW, SE, SW)

Corner of Section 11 _____ Township 21N _____ Range 15E _____

County Rogers _____ Size of line 3/4" _____ Size of casing N/A _____

The installation will be made in the following manner:

Boring _____

(Boring, pushing, overhead crossing, and other description)

All information requested on the form must be supplied. Drawings clearly illustrating work to be performed within the County maintained roadway right-of-way and all other utility facilities in the area of this permit should be provided with the permit application. A plan view will be sufficient, except where a crossing of this County maintained roadway is involved. Each roadway crossing must be represented by an actual profile and cross-section view, regardless of the type of facility being installed. The owner must self-certify that the facility is located in the corridor approved by the Planning Commission Director.

1. Work to be performed on County right-of-way must have the prior approval of the Planning Commission Director & Board of County Commissioners. The start date and completion date must be provided. Final inspection by the Rogers County Planning Commission will take place at the completion of the project to determine compliance with the approved permit. Under no circumstances will any work be done on County right-of-way until approval has been obtained. No work will be done on County right-of-way on Saturdays, Sundays, Holidays or after dark unless approved by the Planning Commission Director. The Planning Commission Director may require a pre-construction conference.
2. Public utilities or cable television systems shall completely repair or replace any damage, injury or other change to public roads or highways or rights-of-way of this state or any county or municipality which would inconvenience or endanger the public which are caused by the erection, placement, adjustment, construction or maintenance of any public utility or cable television system poles, wires, posts, conduits or other equipment. Okla. Stat. Ann. tit. 69, § 1401 (West)
3. One copy of the approved permit must be kept at the work site for inspection by the Planning Commission Director or his representatives. Applicant is to have an inspector or engineer present at all times during construction to insure that installation is made in accordance with plans and specifications approved by the County. No deviation from the approved plans and specifications will be made without the approval of the Planning Commission Director.

4. The applicant must agree to hold the County harmless for any damage or injury to persons or property caused by or resulting from the construction, maintenance, operation, or repair of his facilities on, under, or over the County right-of-way, and must further agree to reimburse the County for repair of any damage to County facilities caused by the construction, maintenance and/or operation of the facility.
5. No driveways, local roads, County roads, ditch liners, structures or surfaced areas will be cut unless approved by the Planning Commission Director and/or Board of County Commissioners.
6. All work on the County right-of-way is to be done in accordance with current ODOT "Standard Specification for Highway Construction". At the conclusion of such work, the right-of-way must be cleaned up and left in a presentable condition. Cleanup will include replacing any protective grass cover destroyed by trenching or the operation of any equipment, and correcting any other damage that may have been caused, as directed by the Planning Commission Director.
7. The applicant must furnish all flagmen, lights, barricades, and warning signs during the construction, maintenance, or repair of his facilities on the County's right-of-way, as required by County standards and "The Manual on Uniform Traffic Control Devices".
8. In some cases, the applicant must post a performance bond in an amount determined by the Planning Commission Director. Necessity for such bond will be determined by the Planning Commission Director and the bond will be held in his/her office until the right-of-way is in a presentable condition.
9. When notified to do so by the County, the applicant agrees to make all changes in the facilities on County right-of-way within the County's established time period at the applicant's own expense, unless otherwise provided by law or order of the County.
10. **Clearance above the traffic lanes at County highway or local roads at all pole line crossings should comply with applicable safety codes, and will not be less than 20 feet.** All poles, posts, stubs, fixtures, down guys, wires, and other appurtenances must be kept in good repair at all times. Facilities located on the highway right-of-way outside the control of access limits must be kept free of weeds and brush within five feet of the installation. Parallel overhead lines on all highway right-of-way should be limited to single pole construction. All crossing should be as nearly perpendicular as possible. Any deviation must be approved by the Planning Commission Director.
11. All encased crossings should have casing from right-of-way line to right-of-way line and be sealed at both ends with an approved conduit seal (standard neoprene, rubber and comparable seals will be approved) and vented outside the right-of-way lines, unless otherwise approved by the Planning Commission Director. **The top of the conduit should be a minimum of 48 inches below sub-grade, but not less than 30 inches below the bottom of the ditches.** The casing must be designed to sustain roadway loadings, contain and divert from the roadway the contents of the carrier pipe, and have a life expectancy equal to or greater than the carrier pipe. The vents should be sized to allow proper release of carrier pipe contents in case of failure. The minimum pipe size for vents is 2 inch nominal, and the vent must extend a minimum of 36 inches above natural ground level. The owner must install identification markers at each right-of-way line directly above the facility. The markers may be attached to vents or to a right-of-way fence, and should be placed over parallel underground facilities at each change in direction and not more than 1000 foot intervals. The markers may be in the owner's standard design, but must identify the owner stating address and telephone number, size of facility, and must be at least 130 sq. inches in area. They must also be erected at a location plainly visible from within the County right-of-way.

All underground electric cable crossings must be placed in a conduit and be a minimum of 48 inches below the ditch flow lines. Conduit placed beneath a roadway may be steel, HDPE, Heavy Duty PVC or fiberglass if it is designed to withstand highway loading and is properly protected. Encasement for underground power lines, or similar facilities, should comply with the above, except for the installation of vents, and seals, and the ability to contain and divert. Methods for boring the roadway shall be the same as for any other bored crossing. Encasement for underground telephone lines is not required.

Steel pipelines crossing the right-of-way may be installed without encasement if the installation is in accordance with ODOT's "Special Provisions for the Installation of Underground Pipelines...." This Special Provision stipulates in part that carrier pipe material within the right-of-way must be superior to the carrier pipe material outside the right-of-way by being of steel at least one grade better and of the same wall thickness, or a minimum of one wall thickness greater and of the same alloy. Pipe must be 48 inches below the flow line of drainage ditches and all other highway drainage facilities, and must be properly protected from corrosion.

Facilities such as water and sanitary sewer lines, crossing the highway right-of-way may be approved without encasement, if cast or ductile iron, HDPE or material of equal design is used, with the understanding that maintenance in the event of failure will be performed in accordance with the AASHTO publication, "A Policy on the Accommodation of Utilities on Freeway Rights-of-Way" and, more specifically, service will not be rendered from through traffic lanes or ramps. If a replacement facility becomes necessary, replacement will be made by boring or punching under the roadway or by inserting replacement pipe through the existing pipe, or any other approved method that will prevent disturbance of the highway. AC, PVC, or equivalent material lines will not be permitted without the use of a steel or equivalent material, conduit. In any case, all conduit shall be sufficient to withstand roadway loadings.

All underground crossings must be installed by boring or punching or other approved methods. The method and equipment for the installation must be approved by the Planning Commission Director. When boring beneath a roadway, water may be used provided the elevation is a minimum of 5 feet below the sub-grade. Sufficient water for lubricating the bit is acceptable; however, jetting or pressure flushing of the bore will not be permitted. The alignment of the bore is to be established by drilling a pilot hole before beginning the full size bore. When water is used, the annular space outside the conduit or carrier pipe is to have grout placed at a minimum of 10 PSI pressure, to insure against cavities beneath the roadbed. No digging or equipment will be permitted in center medians without special permission from the Planning Commission Director.

When pipe/conduit is placed, construction should be done by either jacking, dry boring, or tunneling. When boring in cohesion less materials, jacking, dry boring, or tunneling shall be done in conjunction with the advancement of a conduit/pipe. When boring in Bentonite Clay or equivalent material, drilling mud shall be required at the ends of the bore for a minimum distance of 1-foot. A natural clay or concrete plug will be acceptable for other bores.

Time to complete a bore shall be kept within the limits of open boring or advancing a conduit that can be properly reamed and cleaned out within one working day. Under no circumstance shall muck or water be left standing inside the bore at the end of a working day, or due to a break-down of equipment for more than eight hours.

If considered necessary, pressure grouting of the voids will be required when the diameter of any bore exceeds the outside diameter of the pipe by 2 inches or more. No trenching will be allowed inside the control of access limits unless approved by the County. In the interest of safety, no trenching shall be performed or equipment parked within 30 feet of the edge of the traffic lanes. In unusual cases where trenching is necessary, a special plan with specifications will be developed by the owner with assistance from the Planning Commission Director, setting out the method for controlling the traffic, placement of the facility and proper restoration of the roadway. These specifications must be approved by the Planning Commission Director.

11. Parallel facilities outside the control of access, but inside the right-of-way, must be installed in the assigned corridor, as approved by the Planning Commission Director. **The utility owner will be responsible for any damage resulting from deviation of the assigned corridor. All buried facilities should be placed at a minimum depth 30 inches, except for power, which should be placed at a minimum of 48 inches below the surface.** All nonferrous lines must have an electrically conductive wire, with test points, or other means of locating the pipe while it is underground. The

- ditch must be backfilled to a density equal to the adjacent soil, and a proper vegetative cover established on the area disturbed. **All parallel underground electric cables must be placed a minimum of 48 inches below the surface and marked at each point of change in direction.**
12. The applicant must agree to refrain from disturbing trees, shrubbery, or any part of the landscape without approval of the Planning Commission Director. If it becomes necessary to disturb trees or shrubbery, the applicant's intentions must be plainly stated in the application that will include size and kind of trees and shrubs, and disposition during installation.
 13. The Utility agrees to comply with all applicable laws and regulations necessary to meet the Oklahoma Department of Environmental Quality (ODE) requirements for pollution prevention including discharges from storm water runoff on this project. Further, the Applicant agrees as stipulated in the Ode's General Permit to secure a storm water permit with the ODE, when required. It is agreed that the project plans and specifications, required schedules for accomplishing the temporary and permanent erosion control work, the storm water pollution prevention plan and the appropriate location map contained in the plans constitute the storm water management plan for the project previously described in the document. The Applicant agrees to have daily operational control of those activities at the site necessary to ensure compliance with plan requirements and permit conditions. The Applicant agrees to file jointly the Notice of Intent (NOI), when required, for a general construction Oklahoma Pollutant Discharge Elimination System (OPDES) permit with ODEQ that authorizes discharges of storm water associated with construction activity from the project site identified in this document.
 14. The applicant must be familiar with the AASHTO Policy referred to above, particularly that portion which prohibits the installation or future maintenance of a utility facility from through traffic lanes or ramps.
 15. **The applicant must agree to hold the County harmless for any and all damage that the utility facilities might sustain while occupying County right-of-way.**
 16. Blasting will not be permitted within the County right-of-way except in unusual cases and only with special approval from the Planning Commission Director.
 17. The applicant agrees to notify all owners who have facilities in the area encompassed by this permit. OKIE ONECALL [(800) 522-6543] and the Commissioner for the District will be notified 5 working days prior to the beginning of any work.

This permit may be revoked for noncompliance or failure to begin work within a one-year period of date of approval.

Applicant is required to contact the Planning Commission office to schedule an inspection prior to installation of the utility to insure that the utility is being placed in the correct location. Applicant is required to schedule an inspection for all boring/trenching inspections to insure the correct depth is in place. Applicant is required to schedule a final inspection once work is complete to release all bonds. Applicant shall insure that all streets, driveways and or property entrances shall be restored to a useable condition by the end of the work day, every day prior to the completion of said work. One copy of the approved permit must be kept at the work site for inspection by the Planning Commission Director or his representatives. Applicant is to have an inspector or engineer present at all times during construction to insure that installation is made in accordance with plans and specifications approved by the County. No deviation from the approved plans and specifications will be made without the approval of the Planning Commission Director. Clearance above the traffic lanes at County highway or local roads at all pole line crossings should comply with applicable safety codes, and will not be less than 20 feet. Any deviation must be approved by the Planning Commission Director. The top of the conduit should be a minimum of 48 inches below sub-grade, but not less than 30 inches below the bottom of the ditches. The utility owner will be responsible for any damage resulting from deviation of the assigned corridor. All buried facilities should be placed at a minimum depth 30 inches, except for power, which should be placed at a minimum of 48 inches below the surface. Observation of all additional requirements indicated in the Utility / Pipeline Permit Application is required.

KMZ 7

Additional

ROGERS COUNTY
OKLAHOMA

District 1

County Staff to Complete this Section

Permit Number: U76-9

Issued Date: _____

Fee Collected: 0.00

UTILITY / PIPELINE PERMIT APPLICATION

The Board of County Commissioners has deemed it necessary and in the public interest to establish policies, requirements, and fees for obtaining permits for the construction of utility lines pertaining to all utility companies, both public and private; oil companies; gas companies; pipe line companies; telephone companies; contractors; developers; engineers or any person, firm or corporation not specifically excluded by law, desiring to construct, install or locate a pipeline, utility line, cable or other facility within the boundaries of a public roadway/street or easement. Prior to constructing any pipeline, utility line, cable line, etc., a permit shall be secured from the Rogers County Office of the Planning Commission.

The following items are required:

- An appropriate scale drawing showing the location of proposed utility installations.
- A Certificate of Liability Insurance for the Contractor
- "As-built" drawings with top of pipe or cable elevations or ground to line clearances shown every one hundred feet (100')
- An erosion control plan
- Applicable fees (Not applicable to political subdivisions and agencies of the State, public trusts, municipal owned utilities, or rural water districts)
 - Administration Fee: \$100.00 (required for all applications)
 - Road Crossing: \$150.00 Each (underground bore or overhead installation)
 - Parallel Installation: \$0.30 per foot of occupied right-of-way
- Cash Bond in the Form of Cashier's Check (Not applicable to political subdivisions and agencies of the State, public trusts, municipal owned utilities, or rural water districts)

\$500.00 for Crossing Gravel Rd

- \$1000.00 for Crossing Hard Surface Rd
- \$500.00 for Parallel Install One Mile or Less
- \$500.00 for Additional Parallel Install per Mile

Installation without first securing a permit, shall incur a fee of Two Thousand Five Hundred Dollars (\$2,500.00) and no future permit shall be issued until all costs, damages and other requirements of these rules and regulations have been met to the satisfaction of the Rogers County Board of County Commissioners.

ROGERS COUNTY
UTILITY PERMIT

PERMIT No. _____

This authority executed in the original and three copies this _____ day of _____, _____ by the Rogers County Planning Commission, acting for and on behalf of Rogers County, Hereinafter called the County, Witnessed:

Telephone: 918-286-4686 _____ E-mail: Angela.Hughes@cox.com, OKCROW@cox.com _____

A permit to erect, construct and maintain a cable line _____ along, upon or across the hereinafter said for the purpose of transporting, selling, and using DATA/Cable TV _____

and shown on the attached and further described as follows:

LOCATION:

To CROSS _____ County Highway or Local Road E. 445 Rd. _____ Approximately 0.14 _____ miles
Cross or Parallel _____ NE of Junction with Old HWY 88 _____
(N.E.S.W.) (Nearest County Highway or Local Road Junction)

and further described as: 2584' _____ feet N _____ of the SE _____
(N.E.S.W.) (NE, NW, SE, SW)
Corner of Section 24 _____ Township 22N _____ Range 15E _____

County Rogers _____ Size of line 0.479" _____ Size of casing 2" _____

The installation will be made in the following manner:

From existing pole, bore 40', place 2" conduit, pull fiber, install new pedestal

(Boring, pushing, overhead crossing, and other description)

All information requested on the form must be supplied. Drawings clearly illustrating work to be performed within the County maintained roadway right-of-way and all other utility facilities in the area of this permit should be provided with the permit application. A plan view will be sufficient, except where a crossing of this County maintained roadway is involved. Each roadway crossing must be represented by an actual profile and cross-section view, regardless of the type of facility being installed. The owner must self-certify that the facility is located in the corridor approved by the Planning Commission Director.

1. Work to be performed on County right-of-way must have the prior approval of the Planning Commission Director & Board of County Commissioners. The start date and completion date must be provided. Final inspection by the Rogers County Planning Commission will take place at the completion of the project to determine compliance with the approved permit. Under no circumstances will any work be done on County right-of-way until approval has been obtained. No work will be done on County right-of-way on Saturdays, Sundays, Holidays or after dark unless approved by the Planning Commission Director. The Planning Commission Director may require a pre-construction conference.
2. Public utilities or cable television systems shall completely repair or replace any damage, injury or other change to public roads or highways or rights-of-way of this state or any county or municipality which would inconvenience or endanger the public which are caused by the erection, placement, adjustment, construction or maintenance of any public utility or cable television system poles, wires, posts, conduits or other equipment. Okla. Stat. Ann. tit. 69, § 1401 (West)
3. One copy of the approved permit must be kept at the work site for inspection by the Planning Commission Director or his representatives. Applicant is to have an inspector or engineer present at all times during construction to insure that installation is made in accordance with plans and specifications approved by the County. No deviation from the approved plans and specifications will be made without the approval of the Planning Commission Director.

4. The applicant must agree to hold the County harmless for any damage or injury to persons or property caused by or resulting from the construction, maintenance, operation, or repair of his facilities on, under, or over the County right-of-way, and must further agree to reimburse the County for repair of any damage to County facilities caused by the construction, maintenance and/or operation of the facility.
5. No driveways, local roads, County roads, ditch liners, structures or surfaced areas will be cut unless approved by the Planning Commission Director and/or Board of County Commissioners.
6. All work on the County right-of-way is to be done in accordance with current ODOT "Standard Specification for Highway Construction". At the conclusion of such work, the right-of-way must be cleaned up and left in a presentable condition. Cleanup will include replacing any protective grass cover destroyed by trenching or the operation of any equipment, and correcting any other damage that may have been caused, as directed by the Planning Commission Director.
7. The applicant must furnish all flagmen, lights, barricades, and warning signs during the construction, maintenance, or repair of his facilities on the County's right-of-way, as required by County standards and "The Manual on Uniform Traffic Control Devices".
8. In some cases, the applicant must post a performance bond in an amount determined by the Planning Commission Director. Necessity for such bond will be determined by the Planning Commission Director and the bond will be held in his/her office until the right-of-way is in a presentable condition.
9. When notified to do so by the County, the applicant agrees to make all changes in the facilities on County right-of-way within the County's established time period at the applicant's own expense, unless otherwise provided by law or order of the County.
10. **Clearance above the traffic lanes at County highway or local roads at all pole line crossings should comply with applicable safety codes, and will not be less than 20 feet.** All poles, posts, stubs, fixtures, down guys, wires, and other appurtenances must be kept in good repair at all times. Facilities located on the highway right-of-way outside the control of access limits must be kept free of weeds and brush within five feet of the installation. Parallel overhead lines on all highway right-of-way should be limited to single pole construction. All crossing should be as nearly perpendicular as possible. Any deviation must be approved by the Planning Commission Director.
11. All encased crossings should have casing from right-of-way line to right-of-way line and be sealed at both ends with an approved conduit seal (standard neoprene, rubber and comparable seals will be approved) and vented outside the right-of-way lines, unless otherwise approved by the Planning Commission Director. **The top of the conduit should be a minimum of 48 inches below sub-grade, but not less than 30 inches below the bottom of the ditches.** The casing must be designed to sustain roadway loadings, contain and divert from the roadway the contents of the carrier pipe, and have a life expectancy equal to or greater than the carrier pipe. The vents should be sized to allow proper release of carrier pipe contents in case of failure. The minimum pipe size for vents is 2 inch nominal, and the vent must extend a minimum of 36 inches above natural ground level. The owner must install identification markers at each right-of-way line directly above the facility. The markers may be attached to vents or to a right-of-way fence, and should be placed over parallel underground facilities at each change in direction and not more than 1000 foot intervals. The markers may be in the owner's standard design, but must identify the owner stating address and telephone number, size of facility, and must be at least 130 sq. inches in area. They must also be erected at a location plainly visible from within the County right-of-way.

All underground electric cable crossings must be placed in a conduit and be a minimum of 48 inches below the ditch flow lines. Conduit placed beneath a roadway may be steel, HDPE, Heavy Duty PVC or fiberglass if it is designed to withstand highway loading and is properly protected. Encasement for underground power lines, or similar facilities, should comply with the above, except for the installation of vents, and seals, and the ability to contain and divert. Methods for boring the roadway shall be the same as for any other bored crossing. Encasement for underground telephone lines is not required.

Steel pipelines crossing the right-of-way may be installed without encasement if the installation is in accordance with ODOT's "Special Provisions for the Installation of Underground Pipelines...." This Special Provision stipulates in part that carrier pipe material within the right-of-way must be superior to the carrier pipe material outside the right-of-way by being of steel at least one grade better and of the same wall thickness, or a minimum of one wall thickness greater and of the same alloy. Pipe must be 48 inches below the flow line of drainage ditches and all other highway drainage facilities, and must be properly protected from corrosion.

Facilities such as water and sanitary sewer lines, crossing the highway right-of-way may be approved without encasement, if cast or ductile iron, HDPE or material of equal design is used, with the understanding that maintenance in the event of failure will be performed in accordance with the AASHTO publication, "A Policy on the Accommodation of Utilities on Freeway Rights-of-Way" and, more specifically, service will not be rendered from through traffic lanes or ramps. If a replacement facility becomes necessary, replacement will be made by boring or punching under the roadway or by inserting replacement pipe through the existing pipe, or any other approved method that will prevent disturbance of the highway. AC, PVC, or equivalent material lines will not be permitted without the use of a steel or equivalent material, conduit. In any case, all conduit shall be sufficient to withstand roadway loadings.

All underground crossings must be installed by boring or punching or other approved methods. The method and equipment for the installation must be approved by the Planning Commission Director. When boring beneath a roadway, water may be used provided the elevation is a minimum of 5 feet below the sub-grade. Sufficient water for lubricating the bit is acceptable; however, jetting or pressure flushing of the bore will not be permitted. The alignment of the bore is to be established by drilling a pilot hole before beginning the full size bore. When water is used, the annular space outside the conduit or carrier pipe is to have grout placed at a minimum of 10 PSI pressure, to insure against cavities beneath the roadbed. No digging or equipment will be permitted in center medians without special permission from the Planning Commission Director.

When pipe/conduit is placed, construction should be done by either jacking, dry boring, or tunneling. When boring in cohesion less materials, jacking, dry boring, or tunneling shall be done in conjunction with the advancement of a conduit/pipe. When boring in Bentonite Clay or equivalent material, drilling mud shall be required at the ends of the bore for a minimum distance of 1-foot. A natural clay or concrete plug will be acceptable for other bores.

Time to complete a bore shall be kept within the limits of open boring or advancing a conduit that can be properly reamed and cleaned out within one working day. Under no circumstance shall muck or water be left standing inside the bore at the end of a working day, or due to a break-down of equipment of more than eight hours.

If considered necessary, pressure grouting of the voids will be required when the diameter of any bore exceeds the outside diameter of the pipe by 2 inches or more. No trenching will be allowed inside the control of access limits unless approved by the County. In the interest of safety, no trenching shall be performed or equipment parked within 30 feet of the edge of the traffic lanes. In unusual cases where trenching is necessary, a special plan with specifications will be developed by the owner with assistance from the Planning Commission Director, setting out the method for controlling the traffic, placement of the facility and proper restoration of the roadway. These specifications must be approved by the Planning Commission Director.

11. Parallel facilities outside the control of access, but inside the right-of-way, must be installed in the assigned corridor, as approved by the Planning Commission Director. **The utility owner will be responsible for any damage resulting from deviation of the assigned corridor. All buried facilities should be placed at a minimum depth 30 inches, except for power, which should be placed at a minimum of 48 inches below the surface.** All nonferrous lines must have an electrically conductive wire, with test points, or other means of locating the pipe while it is underground. The

ditch must be backfilled to a density equal to the adjacent soil, and a proper vegetative cover established on the area disturbed. **All parallel underground electric cables must be placed a minimum of 48 inches below the surface and marked at each point of change in direction.**

12. The applicant must agree to refrain from disturbing trees, shrubbery, or any part of the landscape without approval of the Planning Commission Director. If it becomes necessary to disturb trees or shrubbery, the applicant's intentions must be plainly stated in the application that will include size and kind of trees and shrubs, and disposition during installation.
13. The Utility agrees to comply with all applicable laws and regulations necessary to meet the Oklahoma Department of Environmental Quality (ODE) requirements for pollution prevention including discharges from storm water runoff on this project. Further, the Applicant agrees as stipulated in the Ode's General Permit to secure a storm water permit with the ODE, when required. It is agreed that the project plans and specifications, required schedules for accomplishing the temporary and permanent erosion control work, the storm water pollution prevention plan and the appropriate location map contained in the plans constitute the storm water management plan for the project previously described in the document. The Applicant agrees to have daily operational control of those activities at the site necessary to ensure compliance with plan requirements and permit conditions. The Applicant agrees to file jointly the Notice of Intent (NOI), when required, for a general construction Oklahoma Pollutant Discharge Elimination System (OPDES) permit with ODEQ that authorizes discharges of storm water associated with construction activity from the project site identified in this document.
14. The applicant must be familiar with the AASHTO Policy referred to above, particularly that portion which prohibits the installation or future maintenance of a utility facility from through traffic lanes or ramps.
15. **The applicant must agree to hold the County harmless for any and all damage that the utility facilities might sustain while occupying County right-of-way.**
16. Blasting will not be permitted within the County right-of-way except in unusual cases and only with special approval from the Planning Commission Director.
17. The applicant agrees to notify all owners who have facilities in the area encompassed by this permit. OKIE ONECALL [(800) 522-6543] and the Commissioner for the District will be notified 5 working days prior to the beginning of any work.

This permit may be revoked for noncompliance or failure to begin work within a one-year period of date of approval.

ROGERS COUNTY
OKLAHOMA

District #1

County Staff to Complete this Section

Permit Number: U26-10

Issued Date: _____

Fee Collected: 0.00

UTILITY / PIPELINE PERMIT APPLICATION

The Board of County Commissioners has deemed it necessary and in the public interest to establish policies, requirements, and fees for obtaining permits for the construction of utility lines pertaining to all utility companies, both public and private; oil companies; gas companies; pipe line companies; telephone companies; contractors; developers; engineers or any person, firm or corporation not specifically excluded by law, desiring to construct, install or locate a pipeline, utility line, cable or other facility within the boundaries of a public roadway/street or easement. Prior to constructing any pipeline, utility line, cable line, etc., a permit shall be secured from the Rogers County Office of the Planning Commission.

The following items are required:

- An appropriate scale drawing showing the location of proposed utility installations.
- A Certificate of Liability Insurance for the Contractor
- "As-built" drawings with top of pipe or cable elevations or ground to line clearances shown every one hundred feet (100')
- An erosion control plan
- Applicable fees (Not applicable to political subdivisions and agencies of the State, public trusts, municipal owned utilities, or rural water districts)
 - Administration Fee: \$100.00 (required for all applications)
 - Road Crossing: \$150.00 Each (underground bore or overhead installation)
 - Parallel Installation: \$0.30 per foot of occupied right-of-way
- Cash Bond in the Form of Cashier's Check (Not applicable to political subdivisions and agencies of the State, public trusts, municipal owned utilities, or rural water districts)

\$500.00 for Crossing Gravel Rd

- \$1000.00 for Crossing Hard Surface Rd
- \$500.00 for Parallel Install One Mile or Less
- \$500.00 for Additional Parallel Install per Mile

Installation without first securing a permit, shall incur a fee of Two Thousand Five Hundred Dollars (\$2,500.00) and no future permit shall be issued until all costs, damages and other requirements of these rules and regulations have been met to the satisfaction of the Rogers County Board of County Commissioners.

The installation will be made in the following manner:

From existing pole, bore 46', place 2" conduit, pull fiber.

(Boring, pushing, overhead crossing, and other description)

All information requested on the form must be supplied. Drawings clearly illustrating work to be performed within the County maintained roadway right-of-way and all other utility facilities in the area of this permit should be provided with the permit application. A plan view will be sufficient, except where a crossing of this County maintained roadway is involved. Each roadway crossing must be represented by an actual profile and cross-section view, regardless of the type of facility being installed. The owner must self-certify that the facility is located in the corridor approved by the Planning Commission Director.

1. Work to be performed on County right-of-way must have the prior approval of the Planning Commission Director & Board of County Commissioners. The start date and completion date must be provided. Final inspection by the Rogers County Planning Commission will take place at the completion of the project to determine compliance with the approved permit. Under no circumstances will any work be done on County right-of-way until approval has been obtained. No work will be done on County right-of-way on Saturdays, Sundays, Holidays or after dark unless approved by the Planning Commission Director. The Planning Commission Director may require a pre-construction conference.
2. Public utilities or cable television systems shall completely repair or replace any damage, injury or other change to public roads or highways or rights-of-way of this state or any county or municipality which would inconvenience or endanger the public which are caused by the erection, placement, adjustment, construction or maintenance of any public utility or cable television system poles, wires, posts, conduits or other equipment. Okla. Stat. Ann. tit. 69, § 1401 (West).
3. One copy of the approved permit must be kept at the work site for inspection by the Planning Commission Director or his representatives. Applicant is to have an inspector or engineer present at all times during construction to insure that installation is made in accordance with plans and specifications approved by the County. No deviation from the approved plans and specifications will be made without the approval of the Planning Commission Director.

4. The applicant must agree to hold the County harmless for any damage or injury to persons or property caused by or resulting from the construction, maintenance, operation, or repair of his facilities on, under, or over the County right-of-way, and must further agree to reimburse the County for repair of any damage to County facilities caused by the construction, maintenance and/or operation of the facility.
5. No driveways, local roads, County roads, ditch liners, structures or surfaced areas will be cut unless approved by the Planning Commission Director and/or Board of County Commissioners.
6. All work on the County right-of-way is to be done in accordance with current ODOT "Standard Specification for Highway Construction". At the conclusion of such work, the right-of-way must be cleaned up and left in a presentable condition. Cleanup will include replacing any protective grass cover destroyed by trenching or the operation of any equipment, and correcting any other damage that may have been caused, as directed by the Planning Commission Director.
7. The applicant must furnish all flagmen, lights, barricades, and warning signs during the construction, maintenance, or repair of his facilities on the County's right-of-way, as required by County standards and "The Manual on Uniform Traffic Control Devices".
8. In some cases, the applicant must post a performance bond in an amount determined by the Planning Commission Director. Necessity for such bond will be determined by the Planning Commission Director and the bond will be held in his/her office until the right-of-way is in a presentable condition.
9. When notified to do so by the County, the applicant agrees to make all changes in the facilities on County right-of-way within the County's established time period at the applicant's own expense, unless otherwise provided by law or order of the County.
10. **Clearance above the traffic lanes at County highway or local roads at all pole line crossings should comply with applicable safety codes, and will not be less than 20 feet.** All poles, posts, stubs, fixtures, down guys, wires, and other appurtenances must be kept in good repair at all times. Facilities located on the highway right-of-way outside the control of access limits must be kept free of weeds and brush within five feet of the installation. Parallel overhead lines on all highway right-of-way should be limited to single pole construction. All crossing should be as nearly perpendicular as possible. Any deviation must be approved by the Planning Commission Director.
11. All encased crossings should have casing from right-of-way line to right-of-way line and be sealed at both ends with an approved conduit seal (standard neoprene, rubber and comparable seals will be approved) and vented outside the right-of-way lines, unless otherwise approved by the Planning Commission Director. **The top of the conduit should be a minimum of 48 inches below sub-grade, but not less than 30 inches below the bottom of the ditches.** The casing must be designed to sustain roadway loadings, contain and divert from the roadway the contents of the carrier pipe, and have a life expectancy equal to or greater than the carrier pipe. The vents should be sized to allow proper release of carrier pipe contents in case of failure. The minimum pipe size for vents is 2 inch nominal, and the vent must extend a minimum of 36 inches above natural ground level. The owner must install identification markers at each right-of-way line directly above the facility. The markers may be attached to vents or to a right-of-way fence, and should be placed over parallel underground facilities at each change in direction and not more than 1000 foot intervals. The markers may be in the owner's standard design, but must identify the owner stating address and telephone number, size of facility, and must be at least 130 sq. inches in area. They must also be erected at a location plainly visible from within the County right-of-way.

All underground electric cable crossings must be placed in a conduit and be a minimum of 48 inches below the ditch flow lines. Conduit placed beneath a roadway may be steel, HDPE, Heavy Duty PVC or fiberglass if it is designed to withstand highway loading and is properly protected. Encasement for underground power lines, or similar facilities, should comply with the above, except for the installation of vents, and seals, and the ability to contain and divert. Methods for boring the roadway shall be the same as for any other bored crossing. Encasement for underground telephone lines is not required.

Steel pipelines crossing the right-of-way may be installed without encasement if the installation is in accordance with ODOT's "Special Provisions for the Installation of Underground Pipelines...." This Special Provision stipulates in part that carrier pipe material within the right-of-way must be superior to the carrier pipe material outside the right-of-way by being of steel at least one grade better and of the same wall thickness, or a minimum of one wall thickness greater and of the same alloy. Pipe must be 48 inches below the flow line of drainage ditches and all other highway drainage facilities, and must be properly protected from corrosion.

Facilities such as water and sanitary sewer lines, crossing the highway right-of-way may be approved without encasement, if cast or ductile iron, HDPE or material of equal design is used, with the understanding that maintenance in the event of failure will be performed in accordance with the AASHTO publication, "A Policy on the Accommodation of Utilities on Freeway Rights-of-Way" and, more specifically, service will not be rendered from through traffic lanes or ramps. If a replacement facility becomes necessary, replacement will be made by boring or punching under the roadway or by inserting replacement pipe through the existing pipe, or any other approved method that will prevent disturbance of the highway. AC, PVC, or equivalent material lines will not be permitted without the use of a steel or equivalent material, conduit. In any case, all conduit shall be sufficient to withstand roadway loadings.

All underground crossings must be installed by boring or punching or other approved methods. The method and equipment for the installation must be approved by the Planning Commission Director. When boring beneath a roadway, water may be used provided the elevation is a minimum of 5 feet below the sub-grade. Sufficient water for lubricating the bit is acceptable; however, jetting or pressure flushing of the bore will not be permitted. The alignment of the bore is to be established by drilling a pilot hole before beginning the full size bore. When water is used, the annular space outside the conduit or carrier pipe is to have grout placed at a minimum of 10 PSI pressure, to insure against cavities beneath the roadbed. No digging or equipment will be permitted in center medians without special permission from the Planning Commission Director.

When pipe/conduit is placed, construction should be done by either jacking, dry boring, or tunneling. When boring in cohesion less materials, jacking, dry boring, or tunneling shall be done in conjunction with the advancement of a conduit/pipe. When boring in Bentonite Clay or equivalent material, drilling mud shall be required at the ends of the bore for a minimum distance of 1-foot. A natural clay or concrete plug will be acceptable for other bores.

Time to complete a bore shall be kept within the limits of open boring or advancing a conduit that can be properly reamed and cleaned out within one working day. Under no circumstance shall muck or water be left standing inside the bore at the end of a working day, or due to a break-down of equipment of more than eight hours.

If considered necessary, pressure grouting of the voids will be required when the diameter of any bore exceeds the outside diameter of the pipe by 2 inches or more. No trenching will be allowed inside the control of access limits unless approved by the County. In the interest of safety, no trenching shall be performed or equipment parked within 30 feet of the edge of the traffic lanes. In unusual cases where trenching is necessary, a special plan with specifications will be developed by the owner with assistance from the Planning Commission Director, setting out the method for controlling the traffic, placement of the facility and proper restoration of the roadway. These specifications must be approved by the Planning Commission Director.

11. Parallel facilities outside the control of access, but inside the right-of-way, must be installed in the assigned corridor, as approved by the Planning Commission Director. **The utility owner will be responsible for any damage resulting from deviation of the assigned corridor. All buried facilities should be placed at a minimum depth 30 inches, except for power, which should be placed at a minimum of 48 inches below the surface.** All nonferrous lines must have an electrically conductive wire, with test points, or other means of locating the pipe while it is underground. The

ditch must be backfilled to a density equal to the adjacent soil, and a proper vegetative cover established on the area disturbed. **All parallel underground electric cables must be placed a minimum of 48 inches below the surface and marked at each point of change in direction.**

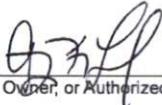

12. The applicant must agree to refrain from disturbing trees, shrubbery, or any part of the landscape without approval of the Planning Commission Director. If it becomes necessary to disturb trees or shrubbery, the applicant's intentions must be plainly stated in the application that will include size and kind of trees and shrubs, and disposition during installation.
13. The Utility agrees to comply with all applicable laws and regulations necessary to meet the Oklahoma Department of Environmental Quality (ODE) requirements for pollution prevention including discharges from storm water runoff on this project. Further, the Applicant agrees as stipulated in the Ode's *General Permit* to secure a storm water permit with the ODE, when required. It is agreed that the project plans and specifications, required schedules for accomplishing the temporary and permanent erosion control work, the storm water pollution prevention plan and the appropriate location map contained in the plans constitute the storm water management plan for the project previously described in the document. The Applicant agrees to have daily operational control of those activities at the site necessary to ensure compliance with plan requirements and permit conditions. The Applicant agrees to file jointly the Notice of Intent (NOI), when required, for a general construction Oklahoma Pollutant Discharge Elimination System (OPDES) permit with ODEQ that authorizes discharges of storm water associated with construction activity from the project site identified in this document.
14. The applicant must be familiar with the AASHTO Policy referred to above, particularly that portion which prohibits the installation or future maintenance of a utility facility from through traffic lanes or ramps.
15. **The applicant must agree to hold the County harmless for any and all damage that the utility facilities might sustain while occupying County right-of-way.**
16. Blasting will not be permitted within the County right-of-way except in unusual cases and only with special approval from the Planning Commission Director.
17. The applicant agrees to notify all owners who have facilities in the area encompassed by this permit. OKIE ONECALL [(800) 522-6543] and the Commissioner for the District will be notified 5 working days prior to the beginning of any work.

This permit may be revoked for noncompliance or failure to begin work within a one-year period of date of approval.

To Cross County Highway or Local Road at 13664 N. 155th E. Ave., Collinsville, approximately 1.11 mile E & 2.09 miles N of Junction US 169 & SH 20 and further described as: 1,966 feet W of the SE Corner of Section 27- TS 22N- Range 14E. Rogers County.

Applicant is required to contact the Planning Commission office to schedule an inspection prior to installation of the utility to insure that the utility is being placed in the correct location. Applicant is required to schedule an inspection for all boring/trenching inspections to insure the correct depth is in place. Applicant is required to schedule a final inspection once work is complete to release all bonds. Applicant shall insure that all streets, driveways and or property entrances shall be restored to a useable condition by the end of the work day, every day prior to the completion of said work. One copy of the approved permit must be kept at the work site for inspection by the Planning Commission Director or his representatives. Applicant is to have an inspector or engineer present at all times during construction to insure that installation is made in accordance with plans and specifications approved by the County. No deviation from the approved plans and specifications will be made without the approval of the Planning Commission Director. Clearance above the traffic lanes at County highway or local roads at all pole line crossings should comply with applicable safety codes, and will not be less than 20 feet. Any deviation must be approved by the Planning Commission Director. The top of the conduit should be a minimum of 48 inches below sub-grade, but not less than 30 inches below the bottom of the ditches. The utility owner will be responsible for any damage resulting from deviation of the assigned corridor. All buried facilities should be placed at a minimum depth 30 inches, except for power, which should be placed at a minimum of 48 inches below the surface. Observation of all additional requirements indicated in the Utility / Pipeline Permit Application is required.

ROGERS COUNTY
OKLAHOMA

District 2

County Staff to Complete this Section

Permit Number: U26-12

Issued Date: _____

Fee Collected: 250.00
#021-08335

UTILITY / PIPELINE PERMIT APPLICATION

The Board of County Commissioners has deemed it necessary and in the public interest to establish policies, requirements, and fees for obtaining permits for the construction of utility lines pertaining to all utility companies, both public and private; oil companies; gas companies; pipe line companies; telephone companies; contractors; developers; engineers or any person, firm or corporation not specifically excluded by law, desiring to construct, install or locate a pipeline, utility line, cable or other facility within the boundaries of a public roadway/street or easement. Prior to constructing any pipeline, utility line, cable line, etc., a permit shall be secured from the Rogers County Office of the Planning Commission.

The following items are required:

- An appropriate scale drawing showing the location of proposed utility installations.
- A Certificate of Liability Insurance for the Contractor
- "As-built" drawings with top of pipe or cable elevations or ground to line clearances shown every one hundred feet (100')
- An erosion control plan
- Applicable fees (Not applicable to political subdivisions and agencies of the State, public trusts, municipal owned utilities, or rural water districts)
 - Administration Fee: \$100.00 (required for all applications)
 - Road Crossing: \$150.00 Each (underground bore or overhead installation)
 - Parallel Installation: \$0.30 per foot of occupied right-of-way
- Cash Bond in the Form of Cashier's Check (Not applicable to political subdivisions and agencies of the State, public trusts, municipal owned utilities, or rural water districts)

\$500.00 for Crossing Gravel Rd

- \$1000.00 for Crossing Hard Surface Rd
- \$500.00 for Parallel Install One Mile or Less
- \$500.00 for Additional Parallel Install per Mile

Installation without first securing a permit, shall incur a fee of Two Thousand Five Hundred Dollars (\$2,500.00) and no future permit shall be issued until all costs, damages and other requirements of these rules and regulations have been met to the satisfaction of the Rogers County Board of County Commissioners.

County Rogers _____ Size of line 3/4" _____ Size of casing N/A _____

The installation will be made in the following manner:

Boring _____

(Boring, pushing, overhead crossing, and other description)

All information requested on the form must be supplied. Drawings clearly illustrating work to be performed within the County maintained roadway right-of-way and all other utility facilities in the area of this permit should be provided with the permit application. A plan view will be sufficient, except where a crossing of this County maintained roadway is involved. Each roadway crossing must be represented by an actual profile and cross-section view, regardless of the type of facility being installed. The owner must self-certify that the facility is located in the corridor approved by the Planning Commission Director.

1. Work to be performed on County right-of-way must have the prior approval of the Planning Commission Director & Board of County Commissioners. The start date and completion date must be provided. Final inspection by the Rogers County Planning Commission will take place at the completion of the project to determine compliance with the approved permit. Under no circumstances will any work be done on County right-of-way until approval has been obtained. No work will be done on County right-of-way on Saturdays, Sundays, Holidays or after dark unless approved by the Planning Commission Director. The Planning Commission Director may require a pre-construction conference.
2. Public utilities or cable television systems shall completely repair or replace any damage, injury or other change to public roads or highways or rights-of-way of this state or any county or municipality which would inconvenience or endanger the public which are caused by the erection, placement, adjustment, construction or maintenance of any public utility or cable television system poles, wires, posts, conduits or other equipment. Okla. Stat. Ann. tit. 69, § 1401 (West)
3. One copy of the approved permit must be kept at the work site for inspection by the Planning Commission Director or his representatives. Applicant is to have an inspector or engineer present at all times during construction to insure that installation is made in accordance with plans and specifications approved by the County. No deviation from the approved plans and specifications will be made without the approval of the Planning Commission Director.

4. The applicant must agree to hold the County harmless for any damage or injury to persons or property caused by or resulting from the construction, maintenance, operation, or repair of his facilities on, under, or over the County right-of-way, and must further agree to reimburse the County for repair of any damage to County facilities caused by the construction, maintenance and/or operation of the facility.
5. No driveways, local roads, County roads, ditch liners, structures or surfaced areas will be cut unless approved by the Planning Commission Director and/or Board of County Commissioners.
6. All work on the County right-of-way is to be done in accordance with current ODOT "Standard Specification for Highway Construction". At the conclusion of such work, the right-of-way must be cleaned up and left in a presentable condition. Cleanup will include replacing any protective grass cover destroyed by trenching or the operation of any equipment, and correcting any other damage that may have been caused, as directed by the Planning Commission Director.
7. The applicant must furnish all flagmen, lights, barricades, and warning signs during the construction, maintenance, or repair of his facilities on the County's right-of-way, as required by County standards and "The Manual on Uniform Traffic Control Devices".
8. In some cases, the applicant must post a performance bond in an amount determined by the Planning Commission Director. Necessity for such bond will be determined by the Planning Commission Director and the bond will be held in his/her office until the right-of-way is in a presentable condition.
9. When notified to do so by the County, the applicant agrees to make all changes in the facilities on County right-of-way within the County's established time period at the applicant's own expense, unless otherwise provided by law or order of the County.
10. **Clearance above the traffic lanes at County highway or local roads at all pole line crossings should comply with applicable safety codes, and will not be less than 20 feet.** All poles, posts, stubs, fixtures, down guys, wires, and other appurtenances must be kept in good repair at all times. Facilities located on the highway right-of-way outside the control of access limits must be kept free of weeds and brush within five feet of the installation. Parallel overhead lines on all highway right-of-way should be limited to single pole construction. All crossing should be as nearly perpendicular as possible. Any deviation must be approved by the Planning Commission Director.
11. All encased crossings should have casing from right-of-way line to right-of-way line and be sealed at both ends with an approved conduit seal (standard neoprene, rubber and comparable seals will be approved) and vented outside the right-of-way lines, unless otherwise approved by the Planning Commission Director. **The top of the conduit should be a minimum of 48 inches below sub-grade, but not less than 30 inches below the bottom of the ditches.** The casing must be designed to sustain roadway loadings, contain and divert from the roadway the contents of the carrier pipe, and have a life expectancy equal to or greater than the carrier pipe. The vents should be sized to allow proper release of carrier pipe contents in case of failure. The minimum pipe size for vents is 2 inch nominal, and the vent must extend a minimum of 36 inches above natural ground level. The owner must install identification markers at each right-of-way line directly above the facility. The markers may be attached to vents or to a right-of-way fence, and should be placed over parallel underground facilities at each change in direction and not more than 1000 foot intervals. The markers may be in the owner's standard design, but must identify the owner stating address and telephone number, size of facility, and must be at least 130 sq. inches in area. They must also be erected at a location plainly visible from within the County right-of-way.

All underground electric cable crossings must be placed in a conduit and be a minimum of 48 inches below the ditch flow lines. Conduit placed beneath a roadway may be steel, HDPE, Heavy Duty PVC or fiberglass if it is designed to withstand highway loading and is properly protected. Encasement for underground power lines, or similar facilities, should comply with the above, except for the installation of vents, and seals, and the ability to contain and divert. Methods for boring the roadway shall be the same as for any other bored crossing. Encasement for underground telephone lines is not required.

Steel pipelines crossing the right-of-way may be installed without encasement if the installation is in accordance with ODOT's "Special Provisions for the Installation of Underground Pipelines...." This Special Provision stipulates in part that carrier pipe material within the right-of-way must be superior to the carrier pipe material outside the right-of-way by being of steel at least one grade better and of the same wall thickness, or a minimum of one wall thickness greater and of the same alloy. Pipe must be 48 inches below the flow line of drainage ditches and all other highway drainage facilities, and must be properly protected from corrosion.

Facilities such as water and sanitary sewer lines, crossing the highway right-of-way may be approved without encasement, if cast or ductile iron, HDPE or material of equal design is used, with the understanding that maintenance in the event of failure will be performed in accordance with the AASHTO publication, "A Policy on the Accommodation of Utilities on Freeway Rights-of-Way" and, more specifically, service will not be rendered from through traffic lanes or ramps. If a replacement facility becomes necessary, replacement will be made by boring or punching under the roadway or by inserting replacement pipe through the existing pipe, or any other approved method that will prevent disturbance of the highway. AC, PVC, or equivalent material lines will not be permitted without the use of a steel or equivalent material, conduit. In any case, all conduit shall be sufficient to withstand roadway loadings.

All underground crossings must be installed by boring or punching or other approved methods. The method and equipment for the installation must be approved by the Planning Commission Director. When boring beneath a roadway, water may be used provided the elevation is a minimum of 5 feet below the sub-grade. Sufficient water for lubricating the bit is acceptable; however, jetting or pressure flushing of the bore will not be permitted. The alignment of the bore is to be established by drilling a pilot hole before beginning the full size bore. When water is used, the annular space outside the conduit or carrier pipe is to have grout placed at a minimum of 10 PSI pressure, to insure against cavities beneath the roadbed. No digging or equipment will be permitted in center medians without special permission from the Planning Commission Director.

When pipe/conduit is placed, construction should be done by either jacking, dry boring, or tunneling. When boring in cohesion less materials, jacking, dry boring, or tunneling shall be done in conjunction with the advancement of a conduit/pipe. When boring in Bentonite Clay or equivalent material, drilling mud shall be required at the ends of the bore for a minimum distance of 1-foot. A natural clay or concrete plug will be acceptable for other bores.

Time to complete a bore shall be kept within the limits of open boring or advancing a conduit that can be properly reamed and cleaned out within one working day. Under no circumstance shall muck or water be left standing inside the bore at the end of a working day, or due to a break-down of equipment of more than eight hours.

If considered necessary, pressure grouting of the voids will be required when the diameter of any bore exceeds the outside diameter of the pipe by 2 inches or more. No trenching will be allowed inside the control of access limits unless approved by the County. In the interest of safety, no trenching shall be performed or equipment parked within 30 feet of the edge of the traffic lanes. In unusual cases where trenching is necessary, a special plan with specifications will be developed by the owner with assistance from the Planning Commission Director, setting out the method for controlling the traffic, placement of the facility and proper restoration of the roadway. These specifications must be approved by the Planning Commission Director.

11. Parallel facilities outside the control of access, but inside the right-of-way, must be installed in the assigned corridor, as approved by the Planning Commission Director. **The utility owner will be responsible for any damage resulting from deviation of the assigned corridor. All buried facilities should be placed at a minimum depth 30 inches, except for power, which should be placed at a minimum of 48 inches below the surface.** All nonferrous lines must have an electrically conductive wire, with test points, or other means of locating the pipe while it is underground. The

- ditch must be backfilled to a density equal to the adjacent soil, and a proper vegetative cover established on the area disturbed. All parallel underground electric cables must be placed a minimum of 48 inches below the surface and marked at each point of change in direction.
12. The applicant must agree to refrain from disturbing trees, shrubbery, or any part of the landscape without approval of the Planning Commission Director. If it becomes necessary to disturb trees or shrubbery, the applicant's intentions must be plainly stated in the application that will include size and kind of trees and shrubs, and disposition during installation.
 13. The Utility agrees to comply with all applicable laws and regulations necessary to meet the Oklahoma Department of Environmental Quality (ODE) requirements for pollution prevention including discharges from storm water runoff on this project. Further, the Applicant agrees as stipulated in the Ode's *General Permit* to secure a storm water permit with the ODE, when required. It is agreed that the project plans and specifications, required schedules for accomplishing the temporary and permanent erosion control work, the storm water pollution prevention plan and the appropriate location map contained in the plans constitute the storm water management plan for the project previously described in the document. The Applicant agrees to have daily operational control of those activities at the site necessary to ensure compliance with plan requirements and permit conditions. The Applicant agrees to file jointly the Notice of Intent (NOI), when required, for a general construction Oklahoma Pollutant Discharge Elimination System (OPDES) permit with ODEQ that authorizes discharges of storm water associated with construction activity from the project site identified in this document.
 14. The applicant must be familiar with the AASHTO Policy referred to above, particularly that portion which prohibits the installation or future maintenance of a utility facility from through traffic lanes or ramps.
 15. **The applicant must agree to hold the County harmless for any and all damage that the utility facilities might sustain while occupying County right-of-way.**
 16. Blasting will not be permitted within the County right-of-way except in unusual cases and only with special approval from the Planning Commission Director.
 17. The applicant agrees to notify all owners who have facilities in the area encompassed by this permit. OKIE ONECALL [(800) 522-6543] and the Commissioner for the District will be notified 5 working days prior to the beginning of any work.

This permit may be revoked for noncompliance or failure to begin work within a one-year period of date of approval.

County Rogers _____ Size of line 2-3/8" _____ Size of casing N/A _____

The installation will be made in the following manner:

Boring

(Boring, pushing, overhead crossing, and other description)

All information requested on the form must be supplied. Drawings clearly illustrating work to be performed within the County maintained roadway right-of-way and all other utility facilities in the area of this permit should be provided with the permit application. A plan view will be sufficient, except where a crossing of this County maintained roadway is involved. Each roadway crossing must be represented by an actual profile and cross-section view, regardless of the type of facility being installed. The owner must self-certify that the facility is located in the corridor approved by the Planning Commission Director.

1. Work to be performed on County right-of-way must have the prior approval of the Planning Commission Director & Board of County Commissioners. The start date and completion date must be provided. Final inspection by the Rogers County Planning Commission will take place at the completion of the project to determine compliance with the approved permit. Under no circumstances will any work be done on County right-of-way until approval has been obtained. No work will be done on County right-of-way on Saturdays, Sundays, Holidays or after dark unless approved by the Planning Commission Director. The Planning Commission Director may require a pre-construction conference.
2. Public utilities or cable television systems shall completely repair or replace any damage, injury or other change to public roads or highways or rights-of-way of this state or any county or municipality which would inconvenience or endanger the public which are caused by the erection, placement, adjustment, construction or maintenance of any public utility or cable television system poles, wires, posts, conduits or other equipment. Okla. Stat. Ann. tit. 69, § 1401 (West)
3. One copy of the approved permit must be kept at the work site for inspection by the Planning Commission Director or his representatives. Applicant is to have an inspector or engineer present at all times during construction to insure that installation is made in accordance with plans and specifications approved by the County. No deviation from the approved plans and specifications will be made without the approval of the Planning Commission Director.

4. The applicant must agree to hold the County harmless for any damage or injury to persons or property caused by or resulting from the construction, maintenance, operation, or repair of his facilities on, under, or over the County right-of-way, and must further agree to reimburse the County for repair of any damage to County facilities caused by the construction, maintenance and/or operation of the facility.
5. No driveways, local roads, County roads, ditch liners, structures or surfaced areas will be cut unless approved by the Planning Commission Director and/or Board of County Commissioners.
6. All work on the County right-of-way is to be done in accordance with current ODOT "Standard Specification for Highway Construction". At the conclusion of such work, the right-of-way must be cleaned up and left in a presentable condition. Cleanup will include replacing any protective grass cover destroyed by trenching or the operation of any equipment, and correcting any other damage that may have been caused, as directed by the Planning Commission Director.
7. The applicant must furnish all flagmen, lights, barricades, and warning signs during the construction, maintenance, or repair of his facilities on the County's right-of-way, as required by County standards and "The Manual on Uniform Traffic Control Devices".
8. In some cases, the applicant must post a performance bond in an amount determined by the Planning Commission Director. Necessity for such bond will be determined by the Planning Commission Director and the bond will be held in his/her office until the right-of-way is in a presentable condition.
9. When notified to do so by the County, the applicant agrees to make all changes in the facilities on County right-of-way within the County's established time period at the applicant's own expense, unless otherwise provided by law or order of the County.
10. **Clearance above the traffic lanes at County highway or local roads at all pole line crossings should comply with applicable safety codes, and will not be less than 20 feet.** All poles, posts, stubs, fixtures, down guys, wires, and other appurtenances must be kept in good repair at all times. Facilities located on the highway right-of-way outside the control of access limits must be kept free of weeds and brush within five feet of the installation. Parallel overhead lines on all highway right-of-way should be limited to single pole construction. All crossing should be as nearly perpendicular as possible. Any deviation must be approved by the Planning Commission Director.
11. All encased crossings should have casing from right-of-way line to right-of-way line and be sealed at both ends with an approved conduit seal (standard neoprene, rubber and comparable seals will be approved) and vented outside the right-of-way lines, unless otherwise approved by the Planning Commission Director. **The top of the conduit should be a minimum of 48 inches below sub-grade, but not less than 30 inches below the bottom of the ditches.** The casing must be designed to sustain roadway loadings, contain and divert from the roadway the contents of the carrier pipe, and have a life expectancy equal to or greater than the carrier pipe. The vents should be sized to allow proper release of carrier pipe contents in case of failure. The minimum pipe size for vents is 2 inch nominal, and the vent must extend a minimum of 36 inches above natural ground level. The owner must install identification markers at each right-of-way line directly above the facility. The markers may be attached to vents or to a right-of-way fence, and should be placed over parallel underground facilities at each change in direction and not more than 1000 foot intervals. The markers may be in the owner's standard design, but must identify the owner stating address and telephone number, size of facility, and must be at least 130 sq. inches in area. They must also be erected at a location plainly visible from within the County right-of-way.

All underground electric cable crossings must be placed in a conduit and be a minimum of 48 inches below the ditch flow lines. Conduit placed beneath a roadway may be steel, HDPE, Heavy Duty PVC or fiberglass if it is designed to withstand highway loading and is properly protected. Encasement for underground power lines, or similar facilities, should comply with the above, except for the installation of vents, and seals, and the ability to contain and divert. Methods for boring the roadway shall be the same as for any other bored crossing. Encasement for underground telephone lines is not required.

Steel pipelines crossing the right-of-way may be installed without encasement if the installation is in accordance with ODOT's "Special Provisions for the Installation of Underground Pipelines...." This Special Provision stipulates in part that carrier pipe material within the right-of-way must be superior to the carrier pipe material outside the right-of-way by being of steel at least one grade better and of the same wall thickness, or a minimum of one wall thickness greater and of the same alloy. Pipe must be 48 inches below the flow line of drainage ditches and all other highway drainage facilities, and must be properly protected from corrosion.

Facilities such as water and sanitary sewer lines, crossing the highway right-of-way may be approved without encasement, if cast or ductile iron, HDPE or material of equal design is used, with the understanding that maintenance in the event of failure will be performed in accordance with the AASHTO publication, "A Policy on the Accommodation of Utilities on Freeway Rights-of-Way" and, more specifically, service will not be rendered from through traffic lanes or ramps. If a replacement facility becomes necessary, replacement will be made by boring or punching under the roadway or by inserting replacement pipe through the existing pipe, or any other approved method that will prevent disturbance of the highway. AC, PVC, or equivalent material lines will not be permitted without the use of a steel or equivalent material, conduit. In any case, all conduit shall be sufficient to withstand roadway loadings.

All underground crossings must be installed by boring or punching or other approved methods. The method and equipment for the installation must be approved by the Planning Commission Director. When boring beneath a roadway, water may be used provided the elevation is a minimum of 5 feet below the sub-grade. Sufficient water for lubricating the bit is acceptable; however, jetting or pressure flushing of the bore will not be permitted. The alignment of the bore is to be established by drilling a pilot hole before beginning the full size bore. When water is used, the annular space outside the conduit or carrier pipe is to have grout placed at a minimum of 10 PSI pressure, to insure against cavities beneath the roadbed. No digging or equipment will be permitted in center medians without special permission from the Planning Commission Director.

When pipe/conduit is placed, construction should be done by either jacking, dry boring, or tunneling. When boring in cohesion less materials, jacking, dry boring, or tunneling shall be done in conjunction with the advancement of a conduit/pipe. When boring in Bentonite Clay or equivalent material, drilling mud shall be required at the ends of the bore for a minimum distance of 1-foot. A natural clay or concrete plug will be acceptable for other bores.

Time to complete a bore shall be kept within the limits of open boring or advancing a conduit that can be properly reamed and cleaned out within one working day. Under no circumstance shall muck or water be left standing inside the bore at the end of a working day, or due to a break-down of equipment of more than eight hours.

If considered necessary, pressure grouting of the voids will be required when the diameter of any bore exceeds the outside diameter of the pipe by 2 inches or more. No trenching will be allowed inside the control of access limits unless approved by the County. In the interest of safety, no trenching shall be performed or equipment parked within 30 feet of the edge of the traffic lanes. In unusual cases where trenching is necessary, a special plan with specifications will be developed by the owner with assistance from the Planning Commission Director, setting out the method for controlling the traffic, placement of the facility and proper restoration of the roadway. These specifications must be approved by the Planning Commission Director.

11. Parallel facilities outside the control of access, but inside the right-of-way, must be installed in the assigned corridor, as approved by the Planning Commission Director. **The utility owner will be responsible for any damage resulting from deviation of the assigned corridor. All buried facilities should be placed at a minimum depth 30 inches, except for power, which should be placed at a minimum of 48 inches below the surface.** All nonferrous lines must have an electrically conductive wire, with test points, or other means of locating the pipe while it is underground. The

- ditch must be backfilled to a density equal to the adjacent soil, and a proper vegetative cover established on the area disturbed. **All parallel underground electric cables must be placed a minimum of 48 inches below the surface and marked at each point of change in direction.**
12. The applicant must agree to refrain from disturbing trees, shrubbery, or any part of the landscape without approval of the Planning Commission Director. If it becomes necessary to disturb trees or shrubbery, the applicant's intentions must be plainly stated in the application that will include size and kind of trees and shrubs, and disposition during installation.
 13. The Utility agrees to comply with all applicable laws and regulations necessary to meet the Oklahoma Department of Environmental Quality (ODE) requirements for pollution prevention including discharges from storm water runoff on this project. Further, the Applicant agrees as stipulated in the Ode's *General Permit* to secure a storm water permit with the ODE, when required. It is agreed that the project plans and specifications, required schedules for accomplishing the temporary and permanent erosion control work, the storm water pollution prevention plan and the appropriate location map contained in the plans constitute the storm water management plan for the project previously described in the document. The Applicant agrees to have daily operational control of those activities at the site necessary to ensure compliance with plan requirements and permit conditions. The Applicant agrees to file jointly the Notice of Intent (NOI), when required, for a general construction Oklahoma Pollutant Discharge Elimination System (OPDES) permit with ODEQ that authorizes discharges of storm water associated with construction activity from the project site identified in this document.
 14. The applicant must be familiar with the AASHTO Policy referred to above, particularly that portion which prohibits the installation or future maintenance of a utility facility from through traffic lanes or ramps.
 15. **The applicant must agree to hold the County harmless for any and all damage that the utility facilities might sustain while occupying County right-of-way.**
 16. Blasting will not be permitted within the County right-of-way except in unusual cases and only with special approval from the Planning Commission Director.
 17. The applicant agrees to notify all owners who have facilities in the area encompassed by this permit. OKIE ONECALL [(800) 522-6543] and the Commissioner for the District will be notified 5 working days prior to the beginning of any work.

This permit may be revoked for noncompliance or failure to begin work within a one-year period of date of approval.

ISSUE NO. 1355 2021. 10. 29. 17:00:00 KST

BID # 2026-34
RFP for Third-Party Industrial Inspection Services
Rogers County, Oklahoma

Rogers County is requesting sealed written proposals for the following:

Third-Party Industrial-Only Mechanical, Electrical, and Plumbing (MEP) Inspection Services

Rogers County, Oklahoma (“County”), by and through its Building Safety & Inspection Services Department, invites sealed proposals from qualified firms or individuals to provide **third-party Industrial Mechanical, Electrical, and Plumbing (MEP) Inspection Services** for **industrial projects only** within Rogers County.

1. Background

Rogers County administers construction permitting and inspections for **industrial projects**. Due to workload and the specialized nature of certain projects, the County seeks qualified third-party inspectors to supplement County staff on an **as-needed** basis.

2. Contract Term

The initial contract term shall be **two (2) years** with the option for the County to renew for up to **three (3) additional one-year terms** upon mutual agreement and satisfactory performance.

3. Categories of Services

Proposers may submit for one or more of the following categories. The County may award each category separately.

Category A – Mechanical Inspection Services

Services may include, but are not limited to:

- HVAC systems
- Industrial ventilation and exhaust systems
- Process piping
- Boilers and pressure vessels (if applicable)
- Ductwork systems
- Energy code compliance
- Mechanical code compliance
- Rough-in and final inspections
- Re-inspections and correction verifications
- 2018 IMC (International Mechanical code) Interpretation

Category B – Electrical Inspection Services

Services may include, but are not limited to:

- Service entrances and feeders
- Switchgear, transformers, and panelboards
- Grounding and bonding systems
- Motor control centers and industrial controls
- Lighting systems
- Emergency and life safety systems
- NEC compliance
- Rough-in and final inspections
- Re-inspections and correction verifications

BID # 2026-34
RFP for Third-Party Industrial Inspection Services
Rogers County, Oklahoma

- NEC 2023 (National Electrical code) Interpretation

Category C – Plumbing Inspection Services

Services may include, but are not limited to:

- Water distribution systems
- Sanitary sewer systems
- Industrial waste systems
- Storm drainage systems
- Gas piping systems
- Grease traps, interceptors, and specialty systems
- Rough-in and final inspections
- Re-inspections and correction verifications
- 2018 IPC (International Plumbing Code) Interpretation

4. General Scope of Work

- Perform inspections within 24-48 hours upon request and coordinate with the General Contractor and County staff
- Provide written inspection reports within **24-48 hours** of inspection
- Identify code deficiencies and verify corrections
- Use County-approved inspection and reporting procedures
- Comply with all adopted building codes and County policies

5. Minimum Qualifications

- Current ICC (International Code Council) certification for the discipline(s) proposed
- Minimum **five (5) years** inspection experience (**industrial required**)
- Knowledge of Oklahoma adopted codes and County amendments
- Ability to perform inspections within Rogers County in a timely manner
- Must not have conflicts of interest with projects inspected
- Provide 3 Professional References

6. Insurance and Licensing

The selected contractor(s) shall, at their own expense, maintain:

- Commercial General Liability: \$1,000,000 per occurrence / \$2,000,000 aggregate
- Automobile Liability (if applicable): \$1,000,000
- Workers Compensation as required by Oklahoma law
- Professional Liability (recommended): \$1,000,000

Proof of insurance shall be provided prior to contract execution.

7. Compensation and Fee Proposal

Proposers shall submit fees in the following formats:

- Hourly rate(s)
- Per-inspection fee schedule

All fees shall include **all costs**, including travel, reports, and administrative expenses.

BID # 2026-34
RFP for Third-Party Industrial Inspection Services
Rogers County, Oklahoma

8. Proposal Submittal Requirements

Proposals shall include the following sections:

1. Cover Letter
2. Firm or Individual Qualifications
3. Personnel and Certifications
4. Relevant Experience (industrial projects only)
5. References (minimum three)
6. Fee Proposal (by category)
7. Proof of Insurance (or statement of ability to provide)
8. Signed Non-Collusion Affidavit

9. Evaluation and Scoring Criteria

Proposals will be evaluated using the following criteria and maximum points:

Criteria	Points
Experience with Industrial Inspections	30
Qualifications and Certifications	20
Capacity, Availability, and Responsiveness	15
Fee Proposal	25
Past Performance / References	10
Total Possible Points	100

Evaluation Matrix (Internal Use)

Proposer Experience (30) Qualifications (20) Capacity (15) Fees (25) References (10) Total (100)

The County reserves the right to interview proposers and request additional information.

10. Selection and Award

Award will be made to the proposer(s) determined to be **lowest and best**, considering qualifications, experience, availability, and cost. The County reserves the right to:

- Award one, multiple, or no contracts
- Reject any or all proposals
- Waive informalities or irregularities
- Negotiate terms with the selected proposer(s)

11. Legal and Procurement Provisions

- This RFP is issued in accordance with Oklahoma law and Rogers County procurement policies.
- The County is not responsible for any costs incurred in proposal preparation.
- All proposals become property of Rogers County.
- Proposers must comply with all applicable federal, state, and local laws.
- No proposal may be withdrawn for **90 days** after the due date.
- The selected firm(s) will be required to execute a County-approved contract.

BID # 2026-34
RFP for Third-Party Industrial Inspection Services
Rogers County, Oklahoma

12. Conflict of Interest

The proposer shall disclose any potential conflicts of interest. The County reserves the right to disqualify any proposer with a conflict that may compromise objectivity.

The following two affidavits are **required** to be completed and submitted with sealed proposal:

1. Affidavit for Filing with Competitive Bid (**must be notarized**)
2. Business Relationship Affidavit (**must be notarized**)

13. Open Records

All proposals are subject to the Oklahoma Open Records Act. Proprietary information must be clearly marked.

14. Submission Instructions

Proposals MUST be received in a sealed envelope by the date and time specified in the invitation to bid.

Each envelope MUST be legibly marked on the outside with the following information:

- The word **BID**
- The Bid/RFP number **2026-34**

When using a carrier such as UPS or Fed-Ex BOTH the interior and exterior envelope must be sealed and marked clearly with the word Bid and the Bid Number

Proposals MUST be returned to:

Rogers County Clerk's Office
Attn: Purchasing Agent
200 S. Lynn Riggs Blvd.
Claremore, OK 74017

15. Point of Contact

All questions shall be directed to:

Samantha Sherman, Purchasing Agent
ssherman@rogerscounty.org
918-923-4429

TRANSFER OF APPROPRIATIONS

Rogers County, Oklahoma

Fiscal Year Ending June 30, 2026

To the Honorable Governing Board:

Due to a need which has arisen in my office or department, and under the authority of 68 O.S. § 3021 and 62 O.S. § 461, I hereby request additional appropriations for current expense in the General fund as shown in exhibit B. I further state that I have obtained written consent to the cancellation of appropriations balances detailed in Exhibit A as evidenced by the signature of the department heads in schedule 2. The reason for this requested transfer is as follows:

Additional Longevity pay - Employees no longer employed at Rogers County

Respectfully submitted this day of 01/22/26

Signature and Title of Officer(s)/Department Head(s):

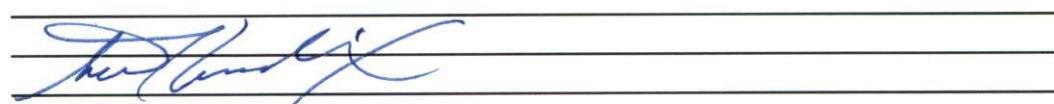

CONSENT TO CANCEL:

I (we) the undersigned official(s)/department head(s) of the above named governmental agency do hereby consent to the cancellation of appropriation balances detailed in Exhibit A.

Signature and Title of Officer(s)/Department Head(s):

CONSENT TO CANCEL AND REQUEST FOR ADDITIONAL NEEDS:

We the undersigned Governing Board under authority of 68 O.S. § 3021 and 62 O.S. § 461, do hereby consent to the cancellation of the appropriation balances detailed in exhibit A and request that the revenues released be appropriated to the accounts detailed in Exhibit B. We further state that this request is made due to the following reason:

Done in a meeting of the Governing Board of the said government agency and recorded in the minutes of the Secretary or Clerk of said board and signed at Claremore this day of

Chairman

Secretary/Clerk

NOTICE TO COUNTY EXCISE BOARD:

Pursuant to 62 O.S. § 461, the undersigned County Clerk of Rogers County, Oklahoma, gives notice to the Rogers County Excise Board that there has been a transfer of appropriations following the approval by the governing board of

ATTEST:

ROGERS COUNTY COOPERATIVE AGREEMENT

This Cooperative Agreement is entered into by and between:

Name (hereinafter referred to as "Owner"):

Ed Sanders

Address (hereinafter referred to as "Property"):

11101 S. 4170 Rd

Claremore, Ok 74017

AND

The Board of County Commissioners for Rogers County, State of Oklahoma
200 S. Lynn Riggs Blvd.,
Claremore, OK 74017
(hereinafter referred to as "County").

The County has identified certain Work (as defined below) that necessitates the County enter the Owner's Property. Subject to the terms and conditions contained in this Cooperative Agreement, Owner hereby agrees to allow County access to the Property for the sole purpose of performing the Work.

SECTION 1

Pursuant to Oklahoma law, Owner and County hereby enter into this Cooperative Agreement to allow the County, its employees, agents, representatives, and contractors access to the above Property to perform the following work (the "Work"):

Removal of brush from the county easement as well as shaping ditches for water

drainage. Removed brush will be placed on landowner's property. County is not

responsible for the replacement of fence.

SECTION 2

The Work is authorized pursuant to: (select the applicable statutory provision for the Work):

- A. OKLA. STAT. tit. 69, § 643.1, which provides:

The board of county commissioners is authorized to enter onto private property adjoining county roads and to perform work by county employees or by contractors working for the county, on such private property, when:

1. The available right-of-way does not provide enough space for needed conservation works of improvement to diminish erosion and siltation of the right-of-way;
2. The owner, or owners, of the adjoining property sign a cooperative agreement permitting such works, which agreement shall state the amount of land to be treated, and the works of improvement to be constructed. Any work performed will be restricted solely to that specified in the cooperative agreement;
3. The local Conservation District has approved the proposed works of improvement; and
4. A copy of the cooperative agreement and a statement of approval from the local Conservation District has been filed with the records of the county commissioners in the office of the county clerk and the cooperative agreement and statement from the local Conservation District have become a part of the minutes of the county commissioners' proceedings.

OR

- B. OKLA. STAT. tit. 69, § 601.5, which provides:

In order to protect the health, safety, and welfare of the children of this state, the board of county commissioners shall be authorized to enter onto private property adjoining county roads in order to perform maintenance or improvements to an existing private road when:

1. The private road is used by a school bus to turn around,
2. The available right-of-way does not provide enough space for the school bus to turn around without endangering the occupants of the school bus; and
3. The owner of the private road agrees in writing to the necessary maintenance or improvements.

The maintenance or improvements to the private road shall be limited to the area necessary for the school bus to adequately turn around.

SECTION 3

Owner hereby grants to County the right and privilege to enter the Property and to take all necessary actions to complete the Work. It is expressly understood and agreed that County shall

have the right of ingress to and egress from the Property to perform the Work. Owner understands that County's completion of the Work may require the use of machinery and equipment on the Property and hereby agrees and authorizes the County's use of any and all equipment and machinery necessary to complete the Work.

SECTION 4

County's presence on the Property shall be limited to the extent necessary to complete the Work. The County's presences on the Property authorized pursuant to this Cooperative Agreement shall be limited solely to the completion of the Work.

SECTION 5

For any Work authorized pursuant to Section 2(A), above, County has obtained all necessary approvals for the Work from the Local Conservation District and is attached hereto as Exhibit A to this Cooperative Agreement.

IN WITNESS WHEREOF, each party to this agreement has caused it to be executed as of the date indicated below.

RESOLUTION
NO. 2026-129

BE IT REMEMBERED THAT ON THE _____ DAY OF
2026, AT A REGULAR MEETING OF THE BOARD OF
COUNTY COMMISSIONERS FOR ROGERS COUNTY, OKLAHOMA, THE
FOLLOWING RESOLUTION WAS ADOPTED:

WHEREAS, C.A.B.O. Development Company, L.L.C. is the Owner of Lots 26 and 27 of
Block 1 of the Bluffs at Stone Canyon, (the “Property”); and

WHEREAS, Lots 26 and 27 of Block 1 each contain ten foot (10’) drainage easements
which abut each other as more particularly described on Exhibit A attached hereto and made a
part hereof (collectively “Drainage Easements”); and

WHEREAS, the Drainage Easements do not permit and do not include any utility
facilities of any kind or nature; and

WHEREAS, the Plat of the Bluffs at Stone Canyon, said Plat being recorded on March
01, 2010, as Document # 2010-003630 of the records of the Rogers County Clerk (the “Plat”),
provides that a property owner may modify or change the direction of drainage of surface water
with the consent of the Developer; and

WHEREAS, attached hereto as Exhibit B is the consent of the Developer to the removal
of the Drainage Easements; and

WHEREAS, attached hereto as Exhibit C is a letter from Brian Kellogg, a registered civil
engineer in the State of Oklahoma, stating that the removal of the Drainage Easements will not
impair the drainage of storm and surface waters over and across said lots and that construction
of a home on the Property will not alter the elevation of the Property as set forth on the Plat and
will not impair the drainage of storm and surface waters over and across the Property; and

WHEREAS, The Bluffs at Stone Canyon Property Owners Association consents to
vacating the Drainage Easements as evidenced by the letter attached hereto and made a part
hereof as Exhibit D; and

WHEREAS, the Owner has requested that the Board of Commissioners of Rogers
County, Oklahoma vacate the Drainage Easements which will allow the Owner to combine the
two lots pursuant to the Lot Combination Procedures set forth in Section 406 of the Subdivision
Regulations of Rogers County; and

WHEREAS, the County Commissioners of Rogers County, Oklahoma, having reviewed the Plat and having reviewed the attachments to this Resolution consenting to the vacation of the Drainage Easements, deem it necessary and expedient to vacate and close to the public use the Drainage Easements as described on Exhibit A attached.

THEREFORE, BE IT RESOLVED, that the Board of County Commissioners of Rogers County, Oklahoma, hereby vacates and closes to the public use the 10' drainage easement on Lot 26, Block 1 and the 10' drainage easement on Lot 27, Block 1 of The Bluffs at Stone Canyon an addition to Rogers County, Oklahoma, according to the recorded Plat thereof, said Plat being recorded on March 01, 2010, as Document # 2010-003630 of the records of the Rogers County Clerk.

PASSED AND APPROVED in regular session this _____ day of _____, 2026.

RE: Vacation of 10' Drainage Easements on
Lots 26 and 27 of Block 1 of the Bluffs
At Stone Canyon

Dear Rogers County Board of County Commissioners:

Pursuant to paragraph 9 of the Plat of the Bluffs at Stone Canyon, said Plat being recorded on March 01, 2010, as Plat #833 of the records of the Rogers County Clerk, C.A.B.O. Development Co., LLC, being the Owner/Developer as set forth therein, does hereby consent to the vacation of the 10' drainage easements located on Lot 26 and on Lot 27 of Block 1 of the Bluffs at Stone Canyon. The combined lots will be responsible for home owners association dues for both lots as originally platted.

Sincerely yours,

Conde B. Burdette

Service Agreement made the 21st day of January 2026 by and between Emergency Power Systems, Inc., 2959 W. 21st Street, Tulsa, Oklahoma, 74107, hereafter referred to as EPS, and Rogers County Sheriffs – Detention Center, 201 S Cherokee Ave, Claremore, OK, 74017, hereafter referred to as CUSTOMER.

EPS shall service the CUSTOMER'S equipment as listed in Schedule A, which is attached hereto and made a part hereof by reference. EPS will perform preventive maintenance service, tests and inspections on listed equipment during regular business hours and in the month(s) agreed to by EPS and CUSTOMER as listed on Schedule A. Emergency service is available 24 hours a day, seven days a week. Prices are listed on Schedule A.

CUSTOMER understands that this **agreement is for labor, oil and oil filter(s), fuel and water filters only. Parts and material used other than those listed will be billed in addition to the Service Agreement.** It is also agreed and understood that the work to be performed hereunder is normal preventive maintenance and service and is not to be construed or considered as a guarantee or warranty by EPS that said equipment shall perform when a power outage occurs. Repairs necessary due to part failure, abuse, accident, alterations, or force majeure shall be billed to CUSTOMER at standard parts, labor and mileage rates.

It is agreed that EPS shall not assume any responsibilities for losses due to down-time during service of CUSTOMER'S equipment.

This 2025 – 2026 agreement shall become effective upon execution and runs from July 1, 2025, to June 30, 2026. This Agreement may be renewed for subsequent 1-year periods running from July 1 to the following June 30, subject to customers governing body making adequate fiscal appropriations. This agreement may be canceled by either party, at any time, upon thirty (30) days' written notice to the other party.

Upon acceptance, this agreement shall become effective on the date first written above.

PM LEVEL I INSPECTION

Services shall be provided on a SEMIANNUAL basis during regular business hours. The cost of services shall be **\$715.00** per visit. **Month service(s) are performed: August.**

PM Level I Services to be performed:

- Check oil level
- Check cooling system
 - Check coolant level
 - Test coolant conditioner level
 - Add DCA4 conditioner as needed
 - Check condition of radiator fan drive belts
 - Check condition of radiator cores and cooling fins
 - Check cooling system lines flexible connectors for signs of leaks and cracking
- Check air intake system
 - Visually inspect condition of air filter
 - Inspect air inlet system flexible connections for wear and cracking
- Check fuel system
 - Inspect system for leaks
 - Check and record subbase fuel tank level
- Check batteries, cables and charging system
 - Visually inspect battery post for signs of corrosion build up, clean as necessary
 - Visually check battery electrolyte level, top off as necessary with distilled water
 - Visually check cables for corrosion and wear
 - Check cables for tightness
 - Check battery charger output voltage
 - Start engine and record starting battery voltage drop during cranking
 - Check charging alternator output voltage
- Check generator operation
- Check and fill out Field Service Report
 - Check for fluid and exhaust leaks
 - Record all engine gauge parameters
 - Oil pressure
 - J/W temperature
 - Fuel pressure
 - DC output voltage
 - Record generator meter readings
 - AC volts
 - Frequency
 - AC amperes (if unit is loaded)

- Visually inspect transfer switch
 - Transfer load from Utility to Generator Set if operations permit
- Check function of the generator system and its components, inform the customer of any needed repairs

PM LEVEL II SERVICE:

Services shall be provided on an **ANNUAL** basis during regular business hours. The cost of services shall be **\$1,554.97** per visit. This price will need to be adjusted annually due to changes in material pricing. **Month service(s) are performed: February.**

PM Level II Services to be performed:

- *Perform PM Level I Inspection
- Change oil and oil filter(s)
 - Drain oil sump
 - Drain filter housings and remove old filter(s)
 - Refill oil sump with 15W40WT DEO
 - Install new oil filter(s)
 - Dispose of used oil with authorized recycle center
 - Drain and crush all filter(s), dispose of crushed filter(s)
- Change fuel filter(s)
 - Drain filter housings and remove old filter(s)
 - Install new fuel filter(s)
 - Drain and crush all filter(s), dispose of crushed filter(s)

*(the PM Level I Inspection included in Level II Service cost)

** EPS supplies CONOCO HD Fleet Supreme SAE 15W-40 Engine Oil (Product Code 1040592) ¹

LOAD BANK SERVICE – (IGSA Unit only)

Load Bank services shall be provided on an **ANNUAL** basis during regular business hours. The cost of services shall be **\$977.50** per visit.

If load banking is performed at the time of a PM service, no additional travel charges will apply.

Load Bank Services to be performed:

- Hook up cables between portable load bank and generator set
- Apply load to NFPA110 standards and run for **2 hours**
- Log all engine and generator parameter readings every 15 minutes
- Remove load and allow engine to cool down for 10 minutes
- Remove cables and place generator set back into automatic mode

OPTIONAL RECOMMENDED SERVICE

OPTIONAL Services shall be provided on an “As Needed” basis during regular business hours. The cost of services shall be as listed.

(Please initial all OPTIONAL services to include in this agreement)

- Oil Sample Testing (recommended annually):
 - Cost: \$45.00 if sample taken during regular PM visit
 - Cost: \$180.00 if dedicated trip is made to take sample
- Jacket Water Coolant Sample Testing (recommended annually):
 - Cost: \$45.00 if sample taken during regular PM visit
 - Cost: \$180.00 if dedicated trip is made to take sample
- Fuel Sample Testing (recommended annually):
 - Cost: \$150.00 if sample taken during regular PM visit
 - Cost: \$285.00 if dedicated trip is made to take sample
- Fuel Tank Top Off Service:
 - Cost: Price of off road #2 diesel plus \$1.00 per gallon
 - Example: Current price of off road #2 diesel is \$3.50/gal plus EPS surcharge of \$1.00/gal = \$4.50/gal of fuel delivered.
 - If fuel is ordered on a dedicated trip, (not during a scheduled PM visit), an additional delivery fee will be applied.
- Fuel Treatment
 - Treat diesel fuel tank with a quality Fuel Treatment
 - $\frac{1}{4}$ gallon treats 250 gallons of fuel
 - Cost: \$55.00 per $\frac{1}{4}$ gallon container

EPS Service Agreements are nontransferable if equipment and/or property is sold.

EPS payment terms are Net 30 with approved credit.

The price for the goods and services hereunder are those shown on the face of this Agreement. The price of this Agreement does not include sales, excise, duties or other similar taxes, unless otherwise expressly provided herein. Any applicable taxes will be added to the price, unless we receive a tax exemption certificate from you which is acceptable to the taxing authorities.

The cost for repair services shall be \$135.00 per hour and \$2.50 per mile during regular business hours. These rates are subject to periodic change. Time and a half will be charged for overtime hours. Double time will be charged on Sundays and Holidays. Any after-hours call is a minimum charge of 4 hours. If cancelled within 1 hour of the initial dispatch, a 2-hour minimum will be charged.

¹ Conoco GUARDOL Fleet EC Engine Oil is a high-quality engine oil formulated from Conoco's premium hydrocracked base stock and unique additive technology. It easily satisfies the warranty requirements of most domestic and import manufacturers of diesel and gasoline engines. HD Fleet Supreme meets or exceeds the latest API CH-4 service requirements, Mack EO-M, EO-M Plus, Cummins CES 20071 and 20076 and Volvo VDS specifications. This heavy-duty engine oil is specifically formulated to meet the needs of the new generation low-emissions diesel engines operated on low-sulfur diesel fuel, as well as older diesel engines designed to operate on high-sulfur diesel fuel. HD Fleet Supreme Engine Oil is recommended for on- and off-highway applications in most engines manufactured by Cummins, Detroit Diesel, Caterpillar, Mack, Navistar, John Deere, Komatsu, Saab-Scania, Volvo- GM and others. HD Fleet Supreme Engine Oil is technologically advanced to provide excellent soot control, as well as protect against wear, deposits, rust and corrosion, foaming, and high-temperature oil oxidation and thickening. HD Fleet Supreme Engine Oil is available in two SAE viscosity grades: 15W-40 and 10W-30.

FISCAL YEAR ADDENDUM TO AGREEMENT

Notwithstanding any provision to the contrary, the term of this agreement shall be until the next ensuing June 30th. The parties agree and understand that while Rogers County may seek renewal of this agreement at the end of the contract term, such renewal cannot be automatic. **Emergency Power Systems, Inc.** and Rogers County acknowledge that this Agreement is a 1-year agreement that may renew at the end of the one-year term, and that such renewal is subject to cancellation in the event Rogers County is unable to obtain funding or appropriations for the payment(s) required pursuant to this Agreement. The parties further agree that each party has the right to renew this agreement for the aforementioned successive one-year terms, but such renewal shall not be effective until the contract renewal has been approved in writing by the Board of County Commissioners of Rogers County. Rogers County further states that such renewal cannot occur until July 1st of the next ensuing fiscal year. For each renewal term, Rogers County agrees to use good faith and reasonable efforts to renew the funding for this Agreement. If any time during the term of this Agreement, Rogers County does not receive appropriations or funding for this Agreement, Rogers County may terminate this Agreement as of June 30th of the current fiscal year. This Agreement shall terminate without liability or penalty to Rogers County, except that Rogers County shall be obligated to pay for all services rendered through the date of termination and **Emergency Power Systems, Inc.** may terminate services as of the date of termination.

**BOARD OF COUNTY COMMISSIONERS
ROGERS COUNTY, OKLAHOMA**

Ron Burrows, Chairman

ATTEST:

Jeanne Heidlage, County Clerk

APPROVED AS TO FORM:

Civil Assistant District Attorney

RESOLUTION NO. 2026-130

APPROVAL OF PURCHASE ORDERS

WHEREAS, pursuant to OKLA. STAT. tit. 19, § 326(A), the Board of County Commissioners of Rogers County must approve all claims against the County; and

WHEREAS, the Board of County Commissioners of Rogers County have reviewed the purchase orders supporting the claims attached hereto as Exhibit A; and

WHEREAS, it is the desire of the Board of County Commissioners of Rogers County that the claims presented in Exhibit A and evidenced by properly prepared purchase orders are appropriate to be paid.

NOW, THEREFORE, BE IT RESOLVED that the aforesaid claims against Rogers County are appropriate and approved by the Board of County Commissioners of Rogers County.

PASSED AND APPROVED by the Board of County Commissioners on this 26th day of January, 2026

Ron Burrows, District 3
Chairman

Dan DeLozier, District 1
Commissioner

(Seal)

Steve Hendrix, District 2
Commissioner

Subscribed and sworn to before me this _____ day of _____, 2026.
